AIA 健康長久好生活

重要通知 | Important Notes

- 友邦強積金優選計劃（「**計劃**」）之**強積金保守基金**及**穩定資本組合**在所有情況下均不保證付還本金。The **MPF Conservative Fund** and the **Capital Stable Portfolio** in the AIA MPF - Prime Value Choice (the "**Scheme**"), do not guarantee the repayment of capital under all circumstances.

- 計劃之**保證組合**純粹投資於一項由友邦保險有限公司（「**承保人**」）以保險單形式發行的核准匯集投資基金，而有關保證亦由承保人提供。因此，你在保證組合的投資（如有）將需承受承保人的信貸風險。有關信貸風險、保證特點及保證條件的詳情，請參閱強積金計劃說明書第3節「基金選擇、投資目標及政策」及附錄二。The **Guaranteed Portfolio** in the Scheme invests solely in an approved pooled investment fund in the form of an insurance policy issued by the AIA Company Limited (the "**Insurer**"). The guarantee is also given by the Insurer. Your investments in the **Guaranteed Portfolio**, if any, are therefore subject to the credit risks of the Insurer. Please refer to the section "3. Fund options, investment objectives and policies" and Appendix 2 to the MPF Scheme Brochure for the details of the credit risk, guarantee features and guarantee conditions.

- 計劃之**保證組合**是資本保證基金。因此，你的投資將需承受保證人（友邦保險有限公司）的信貸風險。成員必須於計劃年度終結日持有此項投資，有關保證才會適用。有關信貸風險、保證特點及保證條件的詳情，請參閱強積金計劃說明書第3節「基金選擇、投資目標及政策」及附錄二。The **Guaranteed Portfolio** in the Scheme is a capital guaranteed fund. Your investments are therefore subject to the credit risks of the guarantor, AIA Company Limited. The guarantee only applies when Members hold their investment until the end of a Scheme Year. Please refer to the section "3. Fund options, investment objectives and policies" and Appendix 2 to the MPF Scheme Brochure for the details of the credit risk, guarantee features and guarantee conditions.

- 在作出投資決定前，你必須衡量個人可承受風險的程度及你的財政狀況。你必須確保所選擇的基金能夠恰當配合本身承受風險的能力。在選擇基金或預設投資策略（「預設投資」）時，如你就某一項基金或預設投資是否適合你（包括是否符合你的投資目標）有任何疑問，應徵詢財務及/或專業人士的意見，並因應你的個人狀況而選擇最適合你的基金。You should consider your own risk tolerance level and financial circumstances before making any investment choices. You must ensure you choose the appropriate funds to meet your risk tolerance. When, in your selection of funds or the MPF Default Investment Strategy (the "DIS"), you are in doubt as to whether a certain fund or the DIS is suitable for you (including whether it is consistent with your investment objectives), you should seek financial and/or professional advice and choose the fund(s) most suitable for you taking into account your circumstances.

- 在投資於預設投資前，你必須衡量個人可承受風險的程度及你的財政狀況。請注意，核心累積基金及65歲後基金可能並不適合你，而核心累積基金及65歲後基金與你的風險概況可能出現風險錯配（導致投資組合的風險可能高於你傾向承受的風險水平）。如就預設投資是否適合你有任何疑問，應徵詢財務及／或專業人士的意見，並因應你的個人狀況而選擇最適合你的基金。You should consider your own risk tolerance level and financial circumstances before investing in the DIS. You should note that the Core Accumulation Fund and the Age 65 Plus Fund may not be suitable for you, and there may be a risk mismatch between the Core Accumulation Fund and the Age 65 Plus Fund and your risk profile (the resulting portfolio risk may be greater than your risk preference). You should seek financial and/or professional advice if you are in doubt as to whether the DIS is suitable for you and make the investment decision most suitable for you taking into account your circumstances.

- 請注意，預設投資的實施可能會影響你的強積金投資及權益。如你對有關影響有任何疑問，我們建議你諮詢受託人的意見。You should note that the implementation of the DIS may have an impact on your MPF investments and benefits. We recommend that you consult with the Trustee if you have doubts on how you are being affected.

- 如你沒有作出投資選擇，你的供款及／或轉移至本計劃的權益將投資於預設投資（具體描述載於強積金計劃說明書第6節「行政程序」）。If you do not make any investment choices, your contributions made and/or benefits transferred into the Scheme will be invested in the DIS as more particularly described in the section "6. Administrative procedures" of the MPF Scheme Brochure.

- 只有年屆65歲或年屆60歲提早退休的成員，可申請（按受託人根據有關強積金要求不時規定的形式及條款，填交要求的文件或表格）分期提取強積金權益或可扣稅自願性供款權益（視情況而定）。有關詳情，請參閱強積金計劃說明書第6節「行政程序」。Members reaching 65th birthday or early retiring on reaching age 60 may apply (subject to the completion of such document or form (in such form and on such terms) as the Trustee may, subject to the relevant MPF requirements, prescribe from time to time) for payment of the MPF Benefits or the TVC Benefits (as the case may be) in instalments. Please refer to the section "6. Administrative procedures" of the MPF Scheme Brochure for further details.

重要通知 | Important Notes

- 若成員現時投資於保證組合，分期提取權益可能影響成員的保證權利，而成員可能失去其保證，即已提取的金額於被提取後將無權享有任何保證。有關保證組合的保證特點的詳情，請參閱強積金計劃說明書附錄二。保證費將適用於繼續投資於保證組合的成員。If a Member is currently investing in the Guaranteed Portfolio, a payment of benefits in instalments may affect the Member's entitlement to the guarantee and the Member may lose his/her guarantee, that is, the amounts withdrawn will not be entitled to any guarantee after withdrawal. For further details regarding the guarantee features of the Guaranteed Portfolio, please refer to Appendix 2 to the MPF Scheme Brochure. A guarantee charge will apply to Members who remain investing in the Guaranteed Portfolio.

- 退休收益基金概不會就分發派息、分發頻率及派息金額／派息率提供任何保證。派息可從基金的已變現之資本增值、資本及／或總收入中撥付，同時亦可在資本中記入／支付全部或部分費用、收費及開支，以致可用作派息的可分派金額增加。從資本中撥付派息及／或實際上從資本中撥付派息代表提取部分原有投資或歸屬於該原有投資的任何資本增值。分發派息將導致退休收益基金在除息日的每單位資產淨值隨即減少。正派息率或高派息率並不代表正回報或高回報。概不保證分派金額或將會作出任何派息。The Retirement Income Fund does not guarantee distribution of dividend, the frequency of distribution, and the dividend amount/yield. Dividends may be paid out of the realised capital gains, capital and/or gross income while charging/paying all or part of the fees, charges and expenses to/out of the capital, resulting in an increase in distributable amount available for dividend distribution. Payment of dividends out of capital and/or effectively out of capital represents a withdrawal of part of the original investment or from any capital gains attributable to that original investment. Distribution of dividends will result in an immediate decrease in the net asset value per unit of the Retirement Income Fund on the ex-dividend date. A positive or high dividend yield does not imply a positive or high return. There is no guarantee of dividend distribution payout or that any dividend distribution will be made.

- 定期及頻繁地分發派息並將有關派息再投資於退休收益基金或將派息投資於強積金保守基金，無可避免會涉及一段派息未有用作再投資／進行投資的投資空檔期，並須重複承受間斷市場風險（現時為每月）。基於派息特點，65歲以下成員在退休收益基金的回報可能會受到負面或正面影響，因為派息被再投資時，其每單位資產淨值可能已上升或下降。因此，65歲以下成員在退休收益基金的回報或會有別於設有類似投資組合但並無派息安排的成分基金，而派息特點對這些成員來說也不一定有利。同樣，65歲或以上成員將派息投資於強積金保守基金亦會面對相同情況。The distribution of dividends for reinvestment of such dividends into the Retirement Income Fund or the distribution of dividends for investment in the MPF Conservative Fund on a regular and frequent basis will inevitably involve an investment time-lag during which dividends are not reinvested/ invested and are subject to out-of-market risk on a recurring basis (currently, on a monthly basis). With the feature of dividend distribution, the return of the Retirement Income Fund for Members aged below 65 may be impacted negatively or positively as its net asset value per unit may have gone up or down at the time when dividends are reinvested. Therefore, the return of the Retirement Income Fund for Members aged below 65 may deviate from that of a constituent fund with similar investment portfolio without such arrangement and may not always be advantageous to these Members. Likewise, the same also applies to Members aged 65 or above in respect of the investment of the dividends into the MPF Conservative Fund.

- 你不應純粹單靠此文件作出任何投資決定。作出任何投資決定前，請參閱強積金計劃說明書以了解詳情（包括風險因素及收費）。You should not base your investment choices on this document alone and should refer to the MPF Scheme Brochure for details (including risk factors and fees and charges) before making any investment decision.

- 投資涉及風險，你可能就你的投資蒙受重大損失且本計劃下可選各項投資選擇並非適合每個人。投資表現及回報可跌可升。Investment involves risks, you may suffer significant loss of your investments and not all investment choices available under the Scheme would be suitable for everyone. Investment performance and returns may go down as well as up.

基金表現概覽備註 | Notes To Fund Performance Review

* 友邦保險有限公司（「承保人」）為本保證組合所投資保險單之承保人。
此項由承保人提供的保證受條款限制，計劃成員必須於有關計劃年度終結日持有此項投資，有關保證才會生效。
若參與僱主選擇參與另一家服務機構之計劃並因而從保證組合提取款項，受僱於終止參與計劃參與僱主的僱員成員的個人賬戶則可能須作出酌情調整（因而可減低成員在個人賬戶的結餘）。酌情調整乃由承保人在成員退出時全權決定，但無論如何比率應不超過個人賬戶結餘的5%。有關本基金及其他基金的資料，計劃參與者須參閱強積金計劃說明書。
承保人每月均會宣布臨時利率（每年不少於0%）。各個人賬戶的利息會每日按臨時利率累計及誌賬。於每個財政年度（截至11月30日止）結束時，承保人會宣布全年利率（「全年利率」）。該全年利率及所宣布的任何臨時利率乃由承保人全權決定，惟承保人保證所宣布的全年利率不少於0%。AIA Company Limited (the "Insurer") is the insurer of the insurance policy underlying the Guaranteed Portfolio. The guarantee provided by the Insurer is subject to conditions and applies only when members hold their investment until the end of a scheme year.
In the event a Participating Employer participates in a scheme provided by another service provider and therefore necessitates any withdrawal(s) from the Guaranteed Portfolio, the Individual Account of an Employee Member of the withdrawing Participating Employer may be subject to a discretionary adjustment (which may reduce the balance of his/her Individual Account). The discretionary adjustment is determined at the sole discretion of the Insurer on withdrawal but will in no event exceed 5% of the individual account balance. Scheme participants are advised to refer to the MPF Scheme Brochure for more information regarding this and other funds.
The Insurer will declare an interim rate (which will not be less than 0% per annum) each month. Interest on individual account will be accrued and credited daily based on the interim rate. At the end of each financial year (ending on 30 November), the Insurer will declare an annual interest rate (the "Annual Rate"). The Annual Rate and any interim rate declared are determined at the sole discretion of the Insurer. The Insurer guarantees that the Annual Rate declared, however, will not be less than 0% per annum.

^ 敬請留意，投資於強積金保守基金的供款有別於將現金存放於銀行或接受存款公司。強積金保守基金在任何情況下均不保證付還本金，及受託人並無責任按賣出價值贖回投資。強積金保守基金並不受香港金融管理局監管。
計劃之強積金保守基金的收費乃透過扣除資產淨值收取，故所列之單位價格/資產淨值/基金表現已反映收費之影響。It should be noted that contributions invested in the MPF Conservative Fund are not the same as placing cash on deposit with a bank or deposit-taking company. The MPF Conservative Fund does not guarantee the repayment of capital under all circumstances and there is no obligation by the Trustee to redeem investments at offer value. The MPF Conservative Fund is not subject to the supervision of the Hong Kong Monetary Authority.
Fees and charges of the MPF Conservative Fund in the Scheme are deducted from the assets of the fund and, therefore, unit price/NAV/fund performance quoted have incorporated the impact of fees and charges.

† 上述風險級別乃由強制性公積金計劃管理局根據《強積金投資基金披露守則》訂明。有關風險級別由友邦（國際）有限公司根據相關強積金基金的最新基金風險標記決定，並只於5月及11月刊更新。上述風險級別並未經證券及期貨事務監察委員會審閱或認可及僅供參考用。The risk class stated above is prescribed by the Mandatory Provident Fund Schemes Authority according to the Code on Disclosure for MPF Investment Funds. Such risk class is determined by AIA International Limited based on the latest fund risk indicator of the relevant MPF Funds and will be updated in May and November issues only. The risk class stated above has not been reviewed or endorsed by the Securities and Futures Commission and is for reference only.

◆ 截至2025年11月30日止財政年度的基金開支比率。成分基金的基金開支比率只會於基金表現概覽匯報日與成分基金的成立日期相隔達兩年後提供。Fund Expense Ratio ("FER") for financial year ended 30 November 2025. FER for the constituent fund will only be shown after the period between the reporting date of the fund performance review and the launch date of the constituent fund reaches 2 years.

Δ 基金風險標記是根據基金過往三年按月回報率計算的年度標準差。資料由友邦保險（國際）有限公司提供。The Fund Risk Indicator is an annualised standard deviation based on the monthly rates of return of the fund over the past three years. This information is provided by AIA International Limited.

□ 表現數據乃以資產淨值對資產淨值計算，並已反映所有收費之影響。The performance data is calculated on a NAV-to-NAV basis and net of all charges.

基金表現概覽備註 | Notes To Fund Performance Review

▲ 平均成本法回報的計算是將指定期內的最終資產淨值與總投資金額比較得出。方法是在指定期內每月最後一個交易日定額投資於同一基金，以當時基金價格（每單位資產淨值）購入相應基金單位，總投資金額則指在該期間內每月供款的總額；而最終資產淨值則為在該期間內所購得的基金單位總數乘以該期間最後一個交易日的基金價格（每單位資產淨值）而得出。此數據僅作舉例用途。Dollar Cost Averaging Return is calculated by comparing the total contributed amount over a specified period with the final NAV (net asset value). A constant amount is used to purchase fund units at the prevailing fund price (NAV per unit) on the last trading day of every month over the specified period. The total contributed amount is the sum of all such monthly contributions. The final NAV is determined by multiplying the total units cumulated over the specified period with the fund price (NAV per unit) on the last trading day of such period. The figures are for illustrative purposes only.

\# 成分基金之十大投資項目乃由友邦保險（國際）有限公司根據基礎基金之投資經理提供個別基礎基金之十五大投資項目（就5月及11月刊而言）及十大投資項目（就1月、3月、7月及9月刊而言）之資產淨值推算得出，並僅供參考用。受限於可得數據，十大投資項目將只於1月、3月、5月、7 月、9月及11月刊更新。The top ten holdings of a constituent fund are calculated by AIA International Limited based on the top fifteen holdings (for May and November issues) and top ten holdings (for January, March, July and September issues) of each of its underlying fund(s), with reference to the NAV of the relevant holdings provided by the investment managers of the underlying funds, and are for reference only. The Top ten holdings will be updated in January, March, May, July, September and November issues only due to data availability.

基金經理報告 | FUND MANAGER'S REPORT

本基金於9月份錄得-1.02%回報。主要拖累來自全球債券策略。受債券收益率飆升和油價高企影響，富時強積金全球股票指數在9月下跌了1%。由於中東地區持續緊張的軍事局勢，導致石油供應存在不確定性，油價整個月都維持在每桶100美元以上。在科技板塊方面，與人工智能相關的股票熱潮持續，支撐了美國的大型藍籌股以及亞洲科技相關產業的股價。由於油價上漲、再加上持續的通脹憂慮以及主要中央銀行進一步加息，推高了債券收益率，導致全球債券市場持續承壓。富時強積金世界政府債券指數（100%港元對沖）在9月份下跌了1.6%。高能源價格、不斷增加的財政赤字、強於預期的經濟數據以及與人工智能相關的債務發行量增加，促使美國、歐元區和日本的央行均上調了政策利率。

The fund recorded -1.02% return in September. The main detractors were global bonds. The FTSE MPF All World Index lost 1% in September as surging bond yields and elevated oil prices weighed on market sentiments. Oil prices traded above USD 100 per barrel during the month as Middle East military tensions continued with uncertainty surrounding oil supply. On technology sector, excitement in artificial intelligence-related stocks continued to support large-cap stocks in the United States and tech-related industries in Asia. Global bond markets remained under pressure as rising oil prices, persistent inflation concerns and further rate hikes pushed yields higher. The FTSE MPF World Government Bond Index (100% Hedged to Hong Kong Dollar) was down by 1.6% in September. The combination of high energy prices, mounting fiscal deficits, stronger-than-expected economic data and rising Artificial Intelligence-related debt issuance prompted the central banks in the United States, the Eurozone and Japan to raise policy rates.

基金經理報告 | FUND MANAGER'S REPORT

本基金於9月份錄得-1.45%回報。主要拖累來自全球債券策略。由於油價上漲、再加上持續的通脹憂慮以及主要中央銀行進一步加息，推高了債券收益率，導致全球債券市場持續承壓。富時強積金世界政府債券指數(100%港元對沖)在9月份下跌了1.6%。高能源價格、不斷增加的財政赤字、強於預期的經濟數據以及與人工智能相關的債務發行量增加，促使美國、歐元區和日本的央行均上調了政策利率。受債券收益率飆升和油價高企影響，富時強積金全球股票指數在9月下跌了1%。

The fund recorded -1.45% return in September. The main detractor were global bonds. Global bond markets remained under pressure as rising oil prices, persistent inflation concerns and further rate hikes pushed yields higher. The FTSE MPF World Government Bond Index (100% Hedged to Hong Kong Dollar) was down by 1.6% in September. The combination of high energy prices, mounting fiscal deficits, stronger-than-expected economic data and rising Artificial Intelligence-related debt issuance prompted the central banks in the United States, the Eurozone and Japan to raise policy rates. The FTSE MPF All World Index lost 1% in September as surging bond yields and elevated oil prices weighed on market sentiments.

本基金於9月份錄得-0.47%回報。主要貢獻來自資訊科技產業和通訊服務業。因為債券收益率持續上升，再加上有關人工智能治理的新聞成為頭條焦點，導致9月份各類行業股份表現不一。道瓊工業平均指數下跌了4.3%，而以科技股為主的納斯達克綜合指數則上漲了1.9%。整體市場的參與度明顯收窄，上升動力主要來自與人工智能相關的股票和大型科技公司。幾家頂尖科技公司的高層領導都提及到對人工智能發展速度過急的安全顧慮，並且建議放慢前沿模型的開發速度。

The fund recorded -0.47 % return in September. The main contributors were the Information Technology and Communication Services sectors. Sector performance varied in September as bond yields continued to move higher and news related to the governance of Artificial Intelligence dominated headlines. The Dow Jones Industrial Average lost 4.3% whereas the tech-heavy Nasdaq Composite Index gained 1.9%. Artificial Intelligence-related stocks and mega cap technology companies stood out as market breadth narrowed. Several top technology companies' leaders had highlighted growing safety concerns around the pace of Artificial Intelligence development and had suggested to slowdown the frontier-model developments.

基金經理報告 | FUND MANAGER'S REPORT

本基金於9月份錄得-2.04%回報。主要拖累來自歐洲股票策略。9月份歐洲斯托克斯指數下跌了2.2%。歐洲央行將政策利率上調25個基點至2.50%，並指出能源價格上漲帶來的通脹上行風險。8月份歐元區消費物價指數按年上漲了3.2%。在切斷來自俄羅斯的能源供應後，中東地緣政治緊張局勢升溫削弱了歐元區經濟的韌性。富時MPF亞太（除日本外）指數9月以港幣計價下跌1.5%。韓國綜合股價指數在9月只輕微上升了0.3%。科技和能源板塊的升幅被消費相關股票的疲弱表現所抵銷。在人工智能相關科技股強勁反彈的推動下，台灣證券交易所加權指數在9月飆升了3.9%。該島的工業生產和出口在8月錄得連續19個月的雙位數年度增長。

The fund recorded -2.04% return in September. The main detractors were European equities. The Euro Stoxx Index was down by 2.2% in September. The European Central Bank raised its key policy rate by 25 basis points to 2.50%, highlighting upside risk to inflation from higher energy prices. The headline Eurozone Consumer Price Index rose 3.2% year-over-year in August. After cutting off energy supply from Russia, Eurozone economy is vulnerable to rising geopolitical tension in the Middle East. The FTSE MPF Asia Pacific ex Japan Index was down by 1.5% in September in HKD term. The Korea Composite Stock Price Index was mildly up 0.3% in September. The gains from technology and energy sectors were offset by the underperformance of consumption-related stocks. Strong interests in artificial intelligence-related technology stocks caused the Taiwan Stock Exchange Weighted Index to jump by 3.9% in September. The island's industrial production and export sector registered double-digit yearly growth for nineteen consecutive months in August.

本基金於9月份錄得-3.19%回報。恒生指數表現落後於其他主要股票市場，9月份下跌了3.7%。聯邦儲備局收緊貨幣政策、美國中期選舉的不確定性、中東軍事衝突升級以及中美科技競爭局勢都打擊了投資者信心。恒生科技指數9月份下跌了7.9%。

The fund recorded -3.19% return in September. The Hang Seng Index underperformed and went down by 3.7% in September. The Federal Reserve rate hike, United States mid-terms elections uncertainty, escalation of Middle East military confrontations and intensifying China-United States technology tensions weighed on investor sentiment. The Hang Seng Tech Index lost 7.9% in September.

基金經理報告 | FUND MANAGER'S REPORT

本基金於9月份錄得-0.94%回報。主要拖累來自歐洲股票策略。受債券收益率飆升和油價高企影響，富時強積金全球股票指數在9月下跌了1%。由於中東地區持續緊張的軍事局勢，導致石油供應存在不確定性，油價整個月都維持在每桶100美元以上。在科技板塊方面，與人工智能相關的股票熱潮持續，支撐了美國的大型藍籌股以及亞洲科技相關產業的股價。9月份歐洲斯托克斯指數下跌了2.2%。歐洲央行將政策利率上調25個基點至2.50%，並指出能源價格上漲帶來的通脹上行風險。8月份歐元區消費物價指數按年上漲了3.2%。在切斷來自俄羅斯的能源供應後，中東地緣政治緊張局勢升溫削弱了歐元區經濟的韌性。

The fund recorded -0.94% return in September. The main detractors were European equities. The FTSE MPF All World Index lost 1% in September as surging bond yields and elevated oil prices weighed on market sentiments. Oil prices traded above USD 100 per barrel during the month as Middle East military tensions continued with uncertainty surrounding oil supply. On technology sector, excitement in Artificial Intelligence-related stocks continued to support large-cap stocks in the United States and tech-related industries in Asia. The Euro Stoxx Index was down by 2.2% in September. The European Central Bank raised its key policy rate by 25 basis points to 2.50%, highlighting upside risk to inflation from higher energy prices. The headline Eurozone Consumer Price Index rose 3.2% year-over-year in August. After cutting off energy supply from Russia, Eurozone economy is vulnerable to rising geopolitical tension in the Middle East.

基金經理報告 | FUND MANAGER'S REPORT

本基金於9月份錄得-2.16%回報。基金表現主要由於美國債券息率抽升所致。本月，由於聯儲局加息，加上經濟數據表現強勁，美國國債收益率曲線往上移。在亞洲美元信貸方面，信用利差有所收窄。進入10月，由於地緣政治局勢維持緊張，當前宏觀經濟狀況和美國政策的不確定性，可能會改變市場對美國貨幣政策決策的預期，美國國債收益率因此會持續波動。因此，中期優質亞洲美元債券仍然是投資重點，以獲得具吸引力的回報，同時亦減少利率波動對價格的負面影響。

The fund recorded -2.16% return in September. Performance was driven mainly by the rise of the United States (U.S.) rates. The US Treasury yield curve shifted upward amid the interest rate hike by the Fed, and strong economic data over the month. Meanwhile, Asian Dollar credits spreads tightened during the month. Going into October, US Treasury bond yields may continue to stay volatile amid ongoing geopolitical tensions, current macroeconomic conditions and uncertainties around US policies, which influence market expectations on the US monetary decisions. As such, medium term high-quality USD bonds continue to be the investment focus for attractive return while minimising the negative price impact from interest rates fluctuations.

基金經理報告 | FUND MANAGER'S REPORT

本基金於9月份錄得-2.71%回報。當時強積金世界政府債券指數（35%港元對沖）9月份錄得下跌。基金表現主要由於環球債券息率抽升所致。9月份環球債券市場遭遇拋售。在經濟增長保持韌性、通脹持續以及政府債券發行量增加的背景下，政府債券和公司債券的息率紛紛升至多年高點。受中東能源基礎設施受損以及霍爾木茲海峽通行受阻的影響，油價攀升至每桶100美元以上，進一步加劇了市場對通脹的擔憂。聯儲局、歐洲央行和日本央行均在當月上調了政策利率，推動全球利率普遍走高。財政的擔憂在法國表現特別明顯，其10年期國債與德國國債的利差擴大至127基點，創下2012年以來的最高水平。10年期美國國債利率從9月的4.75%上升至5.28%。10年期德國國債利率上升26個基點至3.59%。10年期英國國債利率也上升36個基點至5.42%。

The fund recorded -2.71% return in September. The FTSE MPF World Government Bond Index (35% Hong Kong Dollar hedged) posted a negative return in September. Performance was driven mainly by the rise of global rates. Global bond markets experienced a sell-off in September, with sovereign and corporate yields rising to multi-year highs amid resilient economic growth, persistent inflation and increased government issuance. Oil prices climbed above US$100 per barrel following disruptions to Middle East energy infrastructure and constrained traffic through the Strait of Hormuz, reinforcing inflation concerns. The Federal Reserve, European Central Bank and Bank of Japan raised policy rates during the month, contributing to broad-based increases in global interest rates. Fiscal concerns were particularly evident in France, where the 10-year spread over Germany widened to 127 basis points, its highest level since 2012. The 10-year U.S. Treasury yield ended September at 5.28%, up from 4.75% a month earlier. The 10-year Bund yields up 26bps to 3.59%. The UK gilt yields also rose 36bps to 5.42%.

The monthly savings rate prescribed by the Mandatory Provident Fund Schemes Authority (i.e."Prescribed Savings Rate")

基金經理報告 | FUND MANAGER'S REPORT

本基金於9月份錄得0.17%回報。本月，港元短期利率整體上升，而長端升幅較大，走勢跟隨美國國債收益率。進入10月，除了基於本地的資金情況外，地緣政治局勢持續緊張，當前宏觀經濟狀況變化和美國政策的不確定性可能會繼續改變市場對美國貨幣政策決策的預期，亦會影響香港短期利率的走勢。

The fund recorded 0.17% return in September. HKD short term rates moved upward broadly, with longer end rising higher, tracking the US Treasury yields. Going into October, in addition to the domestic funding condition, the elevated rate fluctuations driven by ongoing geopolitical tensions, evolving global macroeconomic conditions and uncertainties surrounding US policies may continue to shape market expectations on the US monetary decisions and impact HKD short term rates.

基金經理報告 | FUND MANAGER'S REPORT

本基金於9月份錄得-2.51%回報。主要拖累來自於香港股票策略。恒生指數表現落後於其他主要股票市場，9月份下跌了3.7%。聯邦儲備局收緊貨幣政策、美國中期選舉的不確定性、中東軍事衝突升級以及中美科技競爭局勢都打擊了投資者信心。恒生科技指數9月份下跌了7.9%。在8月，滬深300指數小幅上升0.8%。全球對人工智能相關硬體的強勁需求，推動資訊受到發達國家加息和國內需求疲軟的拖累，中國滬深300指數9月份下跌了5.8%。然而醫療保健板塊表現較佳，投資者對與人工智能驅動的藥物研發相關股票的興趣增加。9月份，滬深300醫療保健分類指數上漲了2.8%。中國經濟仍呈現不均衡的增長。國內需求依然疲弱，零售銷售年增率從上個月的0.6%放緩到8月份的0.4%。但在海外對高端科技製造產品的強勁需求帶動下，8月份出口按年增長25%。本月，由於美國聯儲局在當月加息，香港政府港元債券收益率曲線跟隨美國國債收益率曲線走勢而上移。就港元信貸而言，信用利差維持穩定。踏入10月，在地緣政治局勢維持緊張、全球宏觀經濟發展以及美國政策不確定性的影響下，市場對美國貨幣政策決策的預期不斷改變，港元債券收益率料將持續波動。同時，本港經濟情況及投資於股票或避險資產的港元資金流向亦會影響港元債券收益率。因此，中期優質港元債券仍然是投資重點，以獲得具吸引力的回報，同時亦能減少利率波動對價格的負面影響。

The fund recorded -2.51% return in September. The main detractors were the Hong Kong equities. The Hang Seng Index underperformed and went down by 3.7% in September. The Federal Reserve rate hike, United States mid-terms elections uncertainty, escalation of Middle East military confrontations and intensifying China-United States technology tensions weighed on investor sentiment. The Hang Seng Tech Index lost 7.9% in September. Dragging down by interest rate tightening in the developed countries and soft domestic demand, the CSI 300 Index went down by 5.8% in September. Nonetheless, healthcare sector did well as there was a strong interest in stocks related to Artificial Intelligence-driven Drug Discovery. In September, CSI 300 Healthcare sub-index went up by 2.8%. Chinese economy is still on an uneven growth trajectory. Domestic demand remained weak with the yearly growth of retail sales decelerated to 0.4% in August from 0.6% a month ago. However, export expanded by 25% year-on-year in August thanks to robust overseas demand for sophisticated high-tech manufacturing products. Hong Kong government HKD bond yield curve shifted upward in September, tracking the US Treasury yield curve as the Fed hiked interest rate during the month. In terms of HKD credits, spreads remained largely stable during the month. Going into October, HKD bond yields are expected to remain volatile amid ongoing geopolitical tensions, global macroeconomic development and uncertainties around US policies, which influence market expectations on the US monetary decisions. Meanwhile, Hong Kong domestic economic conditions and HKD fund flow for equity investments or pursuit of safe-haven assets also influence HKD bond yields. As such, medium term high-quality HKD bonds continue to be the investment focus for attractive return while minimising the negative price impact from interest rates fluctuations.

基金經理報告 | FUND MANAGER'S REPORT

本基金於9月份錄得-1.45%回報。主要貢獻來自美國和亞太區股票策略。受債券收益率飆升和油價高企影響，富時強積金全球股票指數在9月下跌了1%。由於中東地區持續緊張的軍事局勢，導致石油供應存在不確定性，油價整個月都維持在每桶100美元以上。在科技板塊方面，與人工智能相關的股票熱潮持續，支撐了美國的大型藍籌股以及亞洲科技相關產業的股價。恒生指數表現落後於其他主要股票市場，9月份下跌了3.7%。聯邦儲備局收緊貨幣政策、美國中期選舉的不確定性、中東軍事衝突升級以及中美科技競爭局勢都打擊了投資者信心。恒生科技指數9月份下跌了7.9%。由於油價上漲、再加上持續的通脹憂慮以及主要中央銀行進一步加息，推高了債券收益率，導致全球債券市場持續承壓。富時強積金世界政府債券指數 (35%港元對沖) 在9月份下跌了2.1%。高能源價格、不斷增加的財政赤字、強於預期的經濟數據以及與人工智能相關的債務發行量增加，促使美國、歐元區和日本的央行均上調了政策利率。在9月份，因市場擔憂通貨膨脹和預期貨幣緊縮，導致美國十年期國債息率自2007年以來首次突破5.2%。在9月的政策會議上，聯邦儲備局於三年多來首次加息，將基準利率提高25個基點以抑制通脹，目標利率範圍上調至3.75%到4.00%。聯儲局主席沃什提到加息的原因包括經濟和勞動市場的韌性，以及中東地區持續緊張的局勢。

The fund recorded -1.45% return in September. The main contributors were US and Asia Pacific equities. The FTSE MPF All World Index lost 1% in September as surging bond yields and elevated oil prices weighed on market sentiments. Oil prices traded above USD 100 per barrel during the month as Middle East military tensions continued with uncertainty surrounding oil supply. On technology sector, excitement in Artificial Intelligence-related stocks continued to support large-cap stocks in the United States and tech-related industries in Asia. The Hang Seng Index underperformed and went down by 3.7% in September. The Federal Reserve rate hike, United States mid-terms elections uncertainty, escalation of Middle East military confrontations and intensifying China-United States technology tensions weighed on investor sentiment. The Hang Seng Tech Index lost 7.9% in September. Global bond markets remained under pressure as rising oil prices, persistent inflation concerns and further rate hikes pushed yields higher. The FTSE MPF World Government Bond Index (35% HKD Hedged) was down by 2.1% in September. The combination of high energy prices, mounting fiscal deficits, stronger-than-expected economic data and rising Artificial Intelligence-related debt issuance prompted the central banks in the United States, the Eurozone and Japan to raise policy rates. In September, the 10-year United States Treasury yield rose above 5.2% for the first time since 2007 as inflation concerns and monetary tightening expectations remained elevated. At its September policy meeting, the Federal Reserve approved its first interest rates hike in more than three years, raising its benchmark rates by 25 basis points to a target range of 3.75% to 4.00%, as part of a continued effort to combat inflation. Reasons cited by Federal Reserve chairman Kevin Warsh included a resilient economy and labour market, as well as continued tensions in the Middle East.

ASE TECHNOLOGY HOLDING	1.60%

基金經理報告 | FUND MANAGER'S REPORT

本基金於9月份錄得-1.31%回報。主要拖累來自於香港股票策略。恒生指數表現落後於其他主要股票市場，9月份下跌了3.7%。聯邦儲備局收緊貨幣政策、美國中期選舉的不確定性、中東軍事衝突升級以及中美科技競爭局勢都打擊了投資者信心。恒生科技指數9月份下跌了7.9%。在8月，滬深300指數小幅上升0.8%。全球對人工智能相關硬體的強勁需求，推動資訊受到發達國家加息和國內需求疲軟的拖累，中國滬深300指數9月份下跌了5.8%。然而醫療保健板塊表現較佳，投資者對與人工智能驅動的藥物研發相關股票的興趣增加。9月份，滬深300醫療保健分類指數上漲了2.8%。中國經濟仍呈現不均衡的增長。國內需求依然疲弱，零售銷售年增率從上個月的0.6%放緩到8月份的0.4%。但在海外對高端科技製造產品的強勁需求帶動下，8月份出口按年增長25%。在人工智能相關科技股強勁反彈的推動下，台灣證券交易所加權指數在9月飆升了3.9%。該島的工業生產和出口在8月錄得連續十九個月的雙位數年度增長。韓國綜合股價指數在9月只輕微上升了0.3%。科技和能源板塊的升幅被消費相關股票的疲弱表現所抵銷。

The fund recorded -1.31% return in September. The main detractors were the Hong Kong equities. The Hang Seng Index underperformed and went down by 3.7% in September. The Federal Reserve rate hike, United States mid-terms elections uncertainty, escalation of Middle East military confrontations and intensifying China-United States technology tensions weighed on investor sentiment. The Hang Seng Tech Index lost 7.9% in September. Dragging down by interest rate tightening in the developed countries and soft domestic demand, the CSI 300 Index went down by 5.8% in September. Nonetheless, healthcare sector did well as there was a strong interest in stocks related to Artificial Intelligence-driven Drug Discovery. In September, CSI 300 Healthcare sub-index went up by 2.8%. Chinese economy is still on an uneven growth trajectory. Domestic demand remained weak with the yearly growth of retail sales decelerated to 0.4% in August from 0.6% a month ago. However, export expanded by 25% year-on-year in August thanks to robust overseas demand for sophisticated high-tech manufacturing products. Strong interests in Artificial Intelligence-related technology stocks caused the Taiwan Stock Exchange Weighted Index to jump by 3.9% in September. The island's industrial production and export sector registered double-digit yearly growth for nineteen consecutive months in August. The Korea Composite Stock Price Index was mildly up 0.3% in September. The gains from technology and energy sectors were offset by the underperformance of consumption-related stocks.

基金經理報告 | FUND MANAGER'S REPORT

本基金於9月份錄得-3.84%回報。基金績效方面，資本貨物的選股和耐用消費品與服裝的選股和較低持倉作出了貢獻。而軟件與服務和銀行行業的選股則構成拖累。泛歐斯托克600指數在9月錄得下跌。歐洲央行將政策利率上調25個基點至2.50%，並指出能源價格上漲帶來的通脹上行風險。8月份歐元區消費物價指數按年上漲了3.2%。在切斷來自俄羅斯的能源供應後，中東地緣政治緊張局勢升溫削弱了歐元區經濟的韌性。中東能源衝擊為通脹帶來了更明顯的上行風險。地緣政治不確定性加劇，對歐元區經濟活動構成壓力。

The fund recorded -3.84% return in September. For the fund performance, positive contributors included stock selection in Capital Goods and an underweight position as well as stock selection in Consumer Durables and Apparel. Detractors included stock selection in Software and Services and Banks. The Stoxx Europe 600 Index registered negative return in September. The European Central Bank raised its key policy rate by 25 basis points to 2.50%, highlighting upside risk to inflation from higher energy prices. The headline Eurozone Consumer Price Index rose 3.2% year-over-year in August. After cutting off energy supply from Russia, Eurozone economy is vulnerable to rising geopolitical tension in the Middle East. The energy shock from the Middle East introduces a clearer upside risk to inflation. Rising geopolitical uncertainty is weighing on euro area economic activities.

基金經理報告 | FUND MANAGER'S REPORT

本基金於9月份錄得0.03%回報。主要貢獻來自資訊科技產業。因為債券收益率持續上升，再加上有關人工智能治理的新聞成為頭條焦點，導致9月份各類行業股份表現不一。道瓊工業平均指數下跌了4.3%，而以科技股為主的納斯達克綜合指數則上漲了1.9%。整體市場的參與度明顯收窄，上升動力主要來自與人工智能相關的股票和大型科技公司。幾家頂尖科技公司的高層領導都提及到對人工智能發展速度過急的安全顧慮，並且建議放慢前沿模型的開發速度。美國股票市場前景維持審慎樂觀，受到經濟增長具韌性及企業盈利穩健的支持，儘管宏觀不確定性仍然存在。2026年第二季的財報季表現格外強勁，標普500指數成分股的獲利超預期幅度接近29%，創下歷史新高。市場增長持續主要由大盤科技股及人工智能 (AI)相關的資本支出所驅動，同時能源和製造業也呈現強勁復甦態勢。

The fund recorded 0.03% return in September. The main contributor was the Information Technology sector. Sector performance varied in September as bond yields continued to move higher and news related to the governance of Artificial Intelligence dominated headlines. The Dow Jones Industrial Average lost 4.3% whereas the tech-heavy Nasdaq Composite Index gained 1.9%. Artificial Intelligence-related stocks and mega cap technology companies stood out as market breadth narrowed. Several top technology companies' leaders had highlighted growing safety concerns around the pace of Artificial Intelligence development and had suggested to slowdown the frontier-model developments. The US equity market outlook remains cautiously constructive, supported by resilient economic growth and solid corporate earnings, despite lingering macro uncertainties. Q2 2026 earnings season has delivered exceptionally robust results, tracking record-high earnings surprises near 29% for the S&P 500. Growth continues to be heavily driven by large-cap technology and AI-related capital expenditures, alongside strong rebounds in energy and manufacturing sectors.

基金經理報告 | FUND MANAGER'S REPORT

本基金於9月份錄得-1.51%回報。就國家而言，荷蘭是帶動投資組合表現的主要因素，相反加拿大則拖累組合表現。就行業而言，資訊科技帶動相對回報，而金融業則拖累表現。儘管央行政策趨向鷹派、通脹憂慮升溫，以及債息持續上升，股市仍表現出一定韌性。事實上，人工智能（AI）熱潮再度升溫，部分抵銷了上述因素的影響。展望未來，雖然企業盈利仍然強勁，但在利率上升的環境下，市場關注的重點將是股票估值究竟會被壓縮多少。因此，投資團隊的焦點仍然是具韌性、未受顛覆、且資產負債表穩健的商業模式。

The fund recorded -1.51% return in September. At the country level, Netherlands was the key contributor, while Canada detracted. At the sector level, Information Technology added to the relative return, while Financials detracted. Equity markets were resilient amid hawkish central bank actions, inflation fears and rising bond yields. Indeed, these factors were partly offset by renewed enthusiasm on AI. Looking ahead, as earnings remain strong, the key question is how far equity valuations could be compressed in a rising-yield environment. Hence, investment team's focus is on resilient, non-disrupted business models with balance sheet strength.

基金經理報告 | FUND MANAGER'S REPORT

本基金於9月份錄得0.14%回報。本月，由於美國聯儲局在當月加息，香港政府港元債券收益率曲線跟隨美國國債收益率曲線走勢而上移。就港元信貸而言，信用利差維持穩定。踏入10月，在地緣政治局勢維持緊張、全球宏觀經濟發展以及美國政策不確定性的影響下，市場對美國貨幣政策決策的預期不斷改變，港元債券收益率料將持續波動。同時，本港經濟情況及投資於股票或避險資產的港元資金流向亦會影響港元債券收益率。因此，中期優質港元債券仍然是投資重點，以獲得具吸引力的回報，同時亦能減少利率波動對價格的負面影響。

The fund recorded 0.14% return in September. Hong Kong government HKD bond yield curve shifted upward in September, tracking the US Treasury yield curve as the Fed hiked interest rate during the month. In terms of HKD credits, spreads remained largely stable during the month. Going into October, HKD bond yields are expected to remain volatile amid ongoing geopolitical tensions, global macroeconomic development and uncertainties around US policies, which influence market expectations on the US monetary decisions. Meanwhile, Hong Kong domestic economic conditions and HKD fund flow for equity investments or pursuit of safe-haven assets also influence HKD bond yields. As such, medium term high-quality HKD bonds continue to be the investment focus for attractive return while minimising the negative price impact from interest rates fluctuations.

基金經理報告 | FUND MANAGER'S REPORT

本基金於9月份錄得-2.01%回報。主要拖累來自於香港股票策略。受債券收益率飆升和油價高企影響，富時強積金全球股票指數在9月下跌了1%。由於中東地區持續緊張的軍事局勢，導致石油供應存在不確定性，油價整個月都維持在每桶100美元以上。在科技板塊方面，與人工智能相關的股票熱潮持續，支撐了美國的大型藍籌股以及亞洲科技相關產業的股價。恒生指數表現落後於其他主要股票市場，9月份下跌了3.7%。聯邦儲備局收緊貨幣政策、美國中期選舉的不確定性、中東軍事衝突升級以及中美科技競爭局勢都打擊了投資者信心。恒生科技指數9月份下跌了7.9%。由於油價上漲、再加上持續的通脹憂慮以及主要中央銀行進一步加息，推高了債券收益率，導致全球債券市場持續承壓。富時強積金世界政府債券指數 (35%港元對沖) 在9月份下跌了2.1%。高能源價格、不斷增加的財政赤字、強於預期的經濟數據以及與人工智能相關的債務發行量增加，促使美國、歐元區和日本的央行均上調了政策利率。在9月份，因市場擔憂通貨膨脹和預期貨幣緊縮，導致美國十年期國債息率自2007年以來首次突破5.2%。在9月的政策會議上，聯邦儲備局於三年多來首次加息，將基準利率提高25個基點以抑制通脹，目標利率範圍上調至3.75%到4.00%。聯儲局主席沃什提到加息的原因包括經濟和勞動市場的韌性，以及中東地區持續緊張的局勢。

The fund recorded -2.01% return in September. The main detractors were Hong Kong equities. The FTSE MPF All World Index lost 1% in September as surging bond yields and elevated oil prices weighed on market sentiments. Oil prices traded above USD 100 per barrel during the month as Middle East military tensions continued with uncertainty surrounding oil supply. On technology sector, excitement in Artificial Intelligence-related stocks continued to support large-cap stocks in the United States and tech-related industries in Asia. The Hang Seng Index underperformed and went down by 3.7% in September. The Federal Reserve rate hike, United States mid-terms elections uncertainty, escalation of Middle East military confrontations and intensifying China-United States technology tensions weighed on investor sentiment. The Hang Seng Tech Index lost 7.9% in September. Global bond markets remained under pressure as rising oil prices, persistent inflation concerns and further rate hikes pushed yields higher. The FTSE MPF World Government Bond Index (35% HKD Hedged) was down by 2.1% in September. The combination of high energy prices, mounting fiscal deficits, stronger-than-expected economic data and rising Artificial Intelligence-related debt issuance prompted the central banks in the United States, the Eurozone and Japan to raise policy rates. In September, the 10-year United States Treasury yield rose above 5.2% for the first time since 2007 as inflation concerns and monetary tightening expectations remained elevated. At its September policy meeting, the Federal Reserve approved its first interest rates hike in more than three years, raising its benchmark rates by 25 basis points to a target range of 3.75% to 4.00%, as part of a continued effort to combat inflation. Reasons cited by Federal Reserve chairman Kevin Warsh included a resilient economy and labour market, as well as continued tensions in the Middle East.

基金經理報告 | FUND MANAGER'S REPORT

主要拖累來自全球股票策略。受債券收益率飆升和油價高企影響，富時全球高股息殖利率指數在9月下跌了3.6%。由於中東地區持續緊張的軍事局勢，導致石油供應存在不確定性，油價整個月都維持在每桶100美元以上。富時強積金世界政府債券指數（100%港元對沖）在9月份下跌了1.6%。高能源價格、不斷增加的財政赤字、強於預期的經濟數據以及與人工智能相關的債務發行量增加，促使美國、歐元區和日本的央行均上調了政策利率。

The main detractors were global equities. The FTSE All World High Dividend Yield Index fell 3.6% in September as surging bond yields and elevated oil prices weighed on market sentiments. Oil prices traded above USD 100 per barrel during the month as Middle East military tensions continued with uncertainty surrounding oil supply. The FTSE MPF World Government Bond Index (100% Hedged to Hong Kong Dollar) was down by 1.6% in September. The combination of high energy prices, mounting fiscal deficits, stronger-than-expected economic data and rising Artificial Intelligence-related debt issuance prompted the central banks in the United States, the Eurozone and Japan to raise policy rates.
