This leaflet should be read in conjunction with the product brochure of your basic plan.

[^] As of 1 June 2026, compared against similar services offered by Hong Kong major insurance companies. First-in-market refers to Future Wishes Arrangement's feature which allows the policy owner to make different instructions for different specified triggering events in one integrated value-added service.

How does it work?

The policy owner may designate the **Future Wishes Arrangement** while the policy is in force¹. It allows for distinct legacy planning instructions to be triggered by a significant life event as set out below:

Triggering Event

compulsory designation

2. Death of policy owner

optional designation | *Only available for designation if the policy owner and the insured are not the same person*

3. Policy owner is diagnosed with a Specified Illness under Health Impairment Option or as a permanent Mentally Incapacitated Person ²

All instructions and designations made for this Triggering Event will only become effective (i) starting from the 3rd policy anniversary (if only Benefit Payment Option is selected) and (ii) starting from the later of the 3rd policy anniversary and the end of the premium payment term of the basic policy (If Policy Continuation Option is selected, or Policy Continuation Option and Benefit Payment Option are both selected).

Example

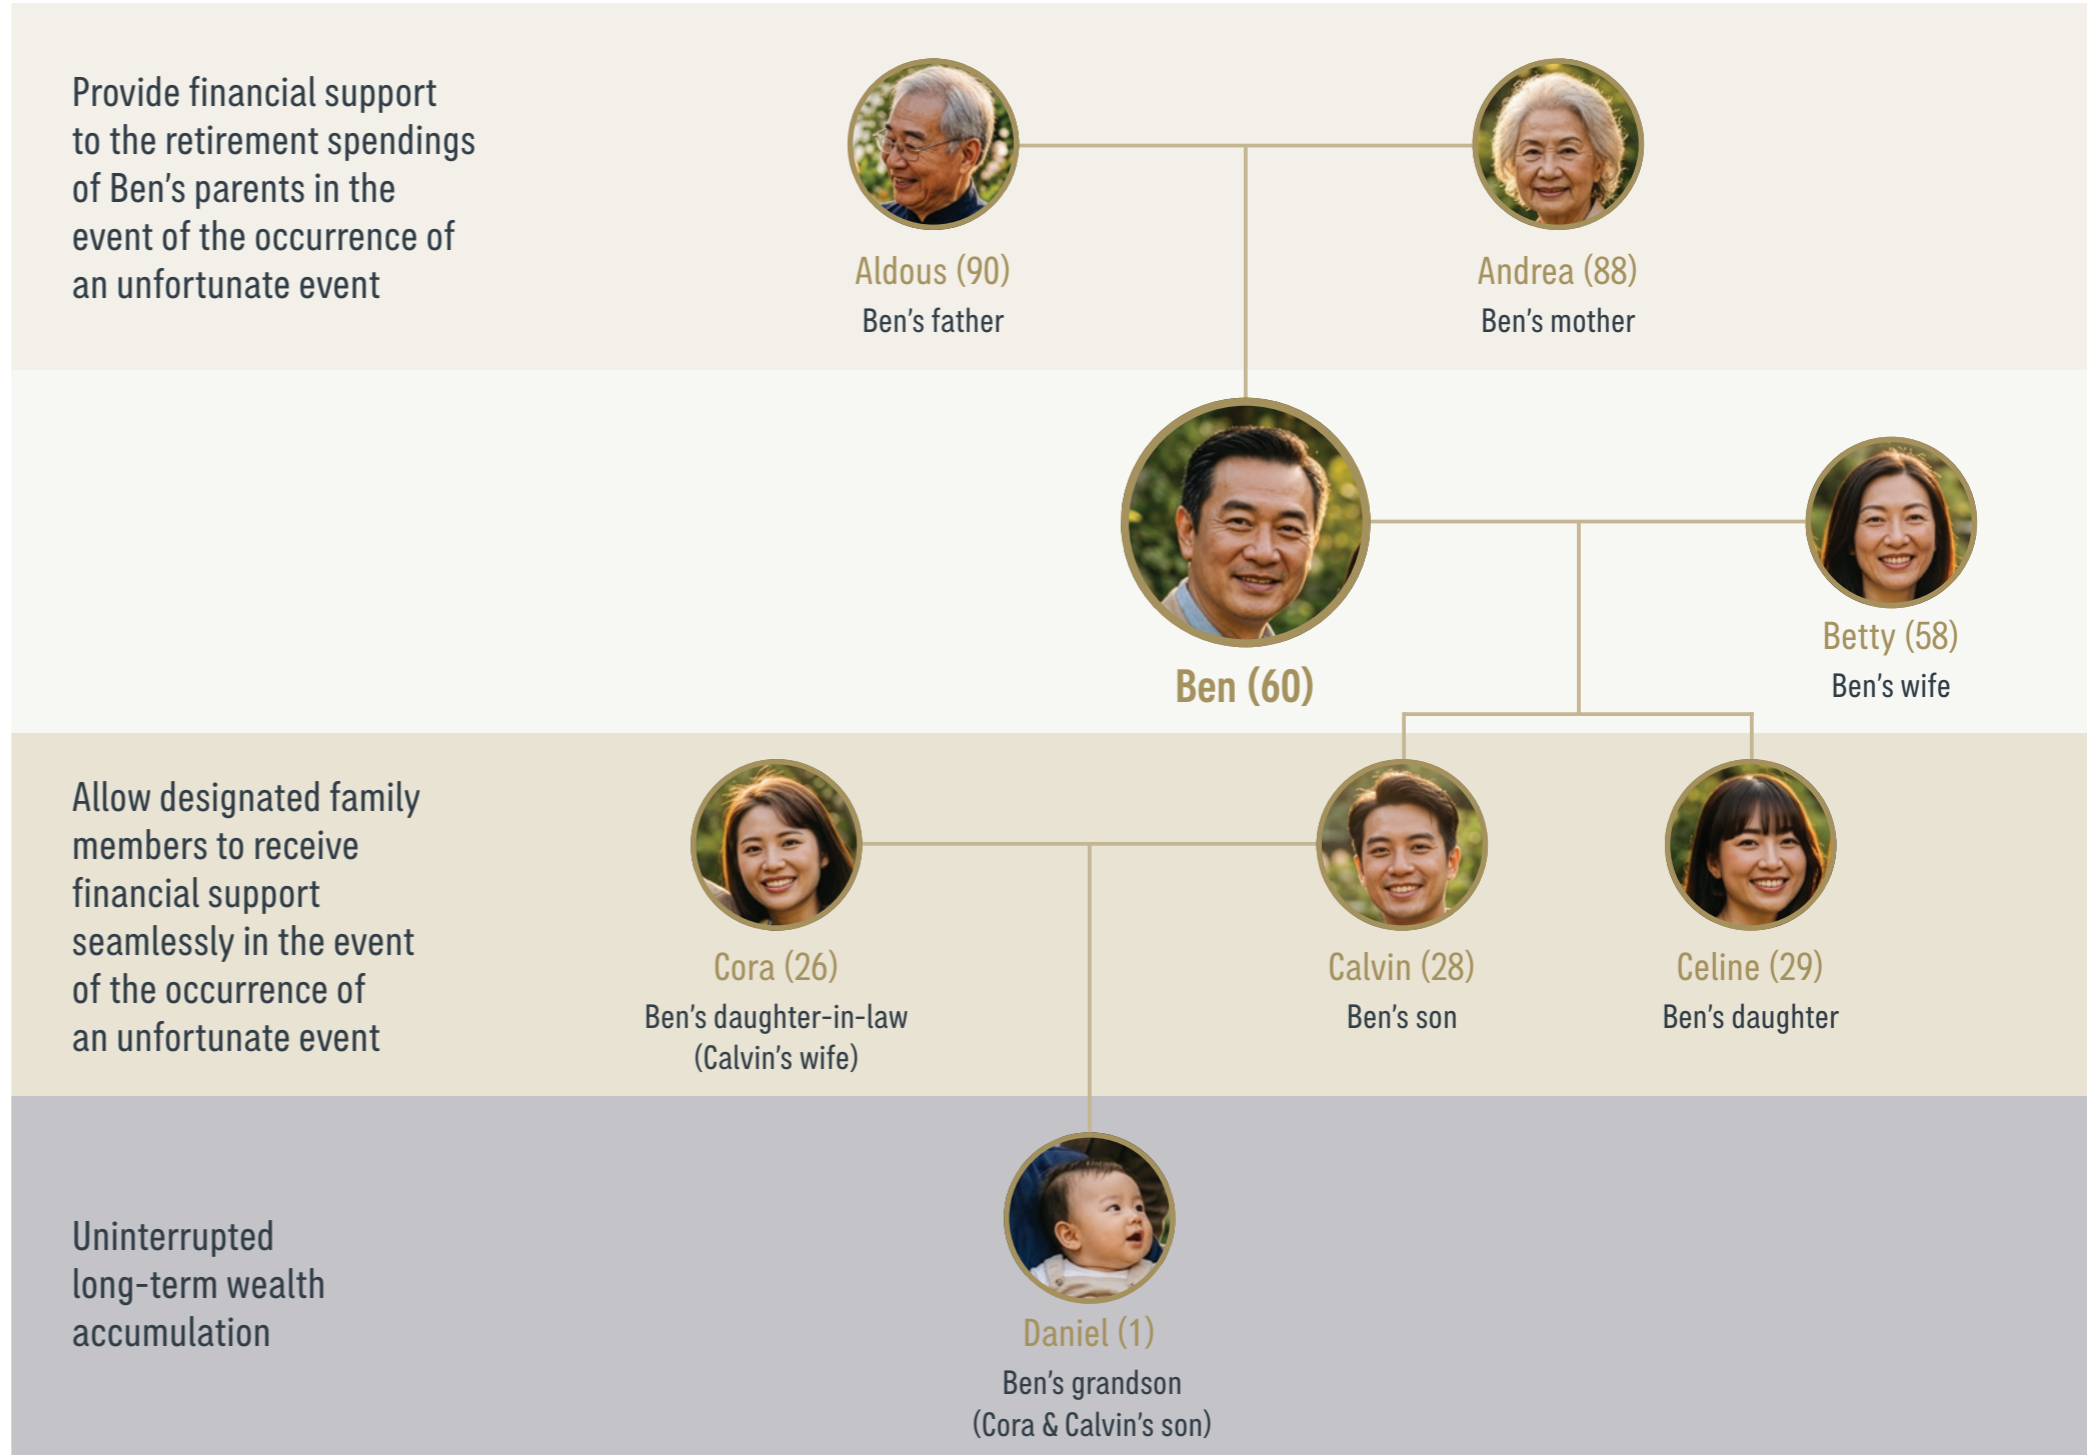

By leveraging insurance to establish wealth legacy, it helps me to facilitate the distribution of my assets among generations of my family according to my wishes.

Policy owner and insured: Ben (age 60)	Family status: A large four generations family consisting of 8 members: parents, son, daughter and grandchild

Ben, age 60, is a distinguished entrepreneur seeking a thoughtful legacy planning solution to secure his family's financial future beyond his lifetime. Allow designated family members to receive financial support seamlessly in the event of the occurrence of an unfortunate event

Multi-generational legacy planning for everlasting prosperity

**Policy owner and insured:
Ben**

Policy owner can designate the allocation percentage for each respective portion under each Triggering Event. However, only 1 Triggering Event can be exercised.

Ben, as the policy owner and insured, applies for the **Future Wishes Arrangement** during the 4th policy year to establish legacy instructions according to his wishes. By separating the policy into multiple portions, he tailors different instructions for different scenarios in case the worst happens. These instructions will be executed in the event that the Company is notified of one of the following Triggering Events:

- Ben passes away; or
- Ben is diagnosed with a Specified Illness under Health Impairment Option or as a permanent Mentally Incapacitated Person.

**Triggering Event:
if Ben passes away**

Ben has designated 3 pairs of Contingent Owners and Contingent Insureds under the Policy Continuation Option:	Ben has made the following designations under the Death Benefit Payout Option:

Ben has designated 1 st Successive Beneficiary and 2 nd Successive Beneficiary (with succession sequence) in case the Beneficiary (Aldous) has passed away before Ben and unable to receive the death benefit.														

OR

**Triggering Event:
if Ben is diagnosed with a Specified Illness under Health Impairment Option or as a permanent Mentally Incapacitated Person***

100% of the principal amount

Portion I 50% of the principal amount	Portion II 50% of the principal amount
Policy Continuation Option Empower designated family member to maintain and manage the policy	Benefit Payment Option Allow designated family member to receive financial support seamlessly
Designated Ownership Recipient	Designated Payment Recipient
1 st Betty (Wife)	1 st Calvin (Son)
	2 nd Celine (Daughter)
If Ben is diagnosed with a Specified Illness under Health Impairment Option or as a permanent Mentally Incapacitated Person, Betty will become the new policy owner of the relevant portion (in this scenario, the relevant portion is 50% of the principal amount of the original policy) if her application for change of ownership is accepted by the Company.	If Ben is diagnosed with a Specified Illness under Health Impairment Option or as a permanent Mentally Incapacitated Person, Calvin will receive the Benefit Payment (an amount based on 50% of the principal amount of the original policy) if his application to receive the Benefit Payment is accepted by the Company.
However, if Betty is unable to become the policy owner for the relevant portion for whatever reason, there will be no change of ownership and Ben will remain as the policy owner.	However, if Calvin has passed away, Celine as the 2 nd Designated Payment Recipient can receive the Benefit Payment if her application to receive the Benefit Payment is accepted by the Company and satisfactory proof of death of Calvin is provided to the Company.

* (1) For the Triggering Event of "Policy owner is diagnosed with a Specified Illness under Health Impairment Option or as a permanent Mentally Incapacitated Person", all instructions and designations made for this Triggering Event will only become effective (i) starting from the 3rd policy anniversary (if only Benefit Payment Option is selected) and (ii) starting from the later of the 3rd policy anniversary and the end of the premium payment term of the basic policy (if only Policy Continuation Option is selected, or Policy Continuation Option and Benefit Payment Option are both selected).

(2) This Triggering Event can only be exercised when the policy owner is diagnosed with a Specified Illness under Health Impairment Option or as a permanent Mentally Incapacitated Person (i) on or after the 3rd policy anniversary (if only Benefit Payment Option is selected) or (ii) on or after the later of the 3rd policy anniversary and the end of the premium payment term of the basic policy (if only Policy Continuation Option is selected, or Policy Continuation Option and Benefit Payment Option are both selected).

(3) We must have received satisfactory proof that the insured is alive, and the policy owner is diagnosed with a Specified Illness under Health Impairment Option or as a permanent mentally incapacitated person before we will make any ownership transfer or Benefit Payment.

(4) Please refer to the product brochure of your basic plan for details of the meaning of "Specified Illness under Health Impairment Option" and "mentally incapacitated person".

Multi-generational legacy planning for everlasting prosperity (continued)

In the unfortunate event Ben passes away due to illness

**Policy owner and insured:
Ben**

This structured approach to legacy planning is designed to address the unique needs of different family members in a single instruction, with each portion separated to help facilitate a seamless transfer of the legacy.

The above illustration example is hypothetical and is for reference only.

Remarks for page 4-5 "How does it work?"

- a. The following must meet the latest Minimum Principal Amount Requirement under Future Wishes Arrangement for the basic plan⁹:
 - each portion of the policy designated for Policy Continuation Option;
 - the entire Death Benefit Payout Option;
 - the Benefit Payment Option; and
 - any other portion of the policy under the Future Wishes Arrangement, e.g. for the Triggering Event of "Policy owner is diagnosed with a Specified Illness under Health Impairment Option or as a permanent Mentally Incapacitated Person", the remainder portion of the policy excluding the Policy Continuation Option portion (if only Policy Continuation Option is selected) or the remainder portion of the policy excluding the Benefit Payment Option portion (if only Benefit Payment Option is selected).
- b. The allocation percentages under each Triggering Event must add up to 100% (if only either Policy Continuation Option or Benefit Payment Option is selected for the Triggering Event "Policy owner is diagnosed with a Specified Illness under Health Impairment Option or as a permanent Mentally Incapacitated Person", this requirement is not applicable to this Triggering Event).
- c. Upon the Company's approval of the policy owner's application to designate Future Wishes Arrangement for the policy, all existing designations of Contingent Owner, Contingent Insured, Designated Ownership Recipient and Designated Payment Recipient for the policy in the Company's records will be automatically revoked.
- d. For the Triggering Event of "Death of policy owner" and the Triggering Event of "Death of insured", if the policy owner has selected more than 1 portion for Policy Continuation Option for any of these Triggering Events, the policy owner will also need to indicate in the application form which portion (only 1 portion can be selected) for the Triggering Event "Death of policy owner" and which portion (only 1 portion can be selected) for the Triggering Event "Death of insured" that may continue to enjoy both the accidental death benefit (provided accidental death benefit coverage is still available under the policy) and the educational merit benefit coverage (provided educational merit benefit coverage is still available under the policy and subject to the per life limit of the benefit) after change of ownership (for the Triggering Event of "Death of policy owner") or after change of insured (for the Triggering Event of "Death of insured") has been made pursuant to the terms of the Future Wishes Arrangement. Such selected portion shall hereafter be referred to as "Specifically Selected Portion". Accidental death benefit and educational merit benefit coverage will not be available in all other portions apart from the Specifically Selected Portion. The educational merit benefit coverage of the Specifically Selected Portion will be forfeited if no change of ownership (for the Triggering Event of "Death of policy owner") or no change of insured (for the Triggering Event of "Death of insured") has been made to the Specifically Selected Portion pursuant to the terms of the Future Wishes Arrangement.

Remarks for page 6-7 "If the worst happens"

- a. Once the Company is notified of the occurrence of a Triggering Event, the Company will exercise the Future Wishes Arrangement according to such Triggering Event, provided (a) there must be no claim in progress under the policy at the time of exercising the Future Wishes Arrangement; and (b) in respect of each portion (including the entire Death Benefit Payout Option), the latest Minimum Principal Amount Requirement under Future Wishes Arrangement for the basic plan are met. If there is a claim in progress at the time of exercising the Future Wishes Arrangement, or the latest Minimum Principal Amount Requirement under Future Wishes Arrangement for the basic plan is not met, the designation of the Future Wishes Arrangement will be automatically revoked and there will be no exercise of Future Wishes Arrangement.
- b. Once the Company is notified of the occurrence of a Triggering Event, all other Triggering Event(s) designated under the Future Wishes Arrangement (including all designations made thereunder except Beneficiaries) (if any) will be revoked simultaneously.
- c. If the Company is notified of the occurrence of more than 1 Triggering Events, the Company will exercise the Triggering Event which has been first notified to the Company that such Triggering Event has occurred.
- d. If the Company is notified of the occurrence of more than 1 Triggering Events at the same time and if one of the Triggering Events is "Death of insured", the Company will only exercise the Triggering Event of "Death of insured", and that all other Triggering Event(s) designated under the Future Wishes Arrangement (including all individuals designated under these Triggering Event(s)) (if any) will be revoked immediately.
- e. After the Company is notified of the occurrence of a Triggering Event but before the completion of execution of the Future Wishes Arrangement, all existing instructions and all applications to exercise any benefits or options of the policy will be revoked or rejected.
- f. Upon exercising the Future Wishes Arrangement, the policy may separate into 2 (or more) portions (for the Triggering Event "Death of insured" or "Death of policy owner") or split into 2 separate policies (for the Triggering Event "Policy owner is diagnosed with a Specified Illness under Health Impairment Option or as a permanent Mentally Incapacitated Person") according to the allocation percentage of principal amount designated by the policy owner.
- g. After the policy is separated into 2 (or more) portions according to the allocation percentage of principal amount designated by the policy owner for each portion, as a result of exercising the Policy Continuation Option for the Triggering Event of "Death of insured" or "Death of policy owner", (i) except for accidental death benefit and educational merit benefit, all terms and conditions of each portion of the policy will follow the original policy unless otherwise specified; (ii) the policy currency, policy date, issue date and commencement date of each portion of the policy will be the same as the original policy; (iii) the Company will determine the existing and future amounts of guaranteed cash value, the face values and cash values of reversionary bonus and terminal bonus respectively for each portion of the policy according to each of their principal amount; (iv) the Company will determine the remaining balance of the Value Safeguard Account (if any) and of the Bonus Lock-in Account (if any) for each portion of the policy according to each of their principal amount; and (v) the single premium paid or total basic premiums paid (as the case may be) and future premiums payable (if any) for each portion of the policy will be adjusted according to its principal amount.

Upon exercising the Triggering Event "Policy owner is diagnosed with a Specified Illness under Health Impairment Option or as a permanent Mentally Incapacitated Person", the policy may split into two separate policies according to the allocation percentage of principal amount designated by the policy owner for the two separate policies ("main policy" and "split policy"), and (i) except for educational merit benefit, all terms and conditions of the main policy and split policy will follow the original policy unless otherwise specified; (ii) the policy currency, policy date, issue date and commencement date of the main policy and split policy will be the same as the original policy; (iii) the Company will determine the existing and future amounts of guaranteed cash value, the face values and cash values of reversionary bonus and terminal bonus respectively for the main policy and split policy according to each of their principal amount; (iv) the Company will determine the remaining balance of the Value Safeguard Account (if any) and of the Bonus Lock-in Account (if any) for the main policy and split policy according to each of their principal amount; and (v) the single premium paid or total basic premiums paid (as the case may be) and future premiums payable (if any) for each of the main policy and split policy will be adjusted according to its principal amount.

- h. **Note:** If the Future Wishes Arrangement is exercised during the premium payment term, after exercising Future Wishes Arrangement, the sum of the future premiums payable of all portions of the policy may be higher than the future premiums payable of the original policy. All changes of ownership, changes of insured, benefit payment, death benefit and accidental death benefit made by the Company pursuant to the Future Wishes Arrangement cannot be reversed once made.
