

EXECUTIVE CARE PRO 2 (ECP2)

Always by your side with whole-hearted protection

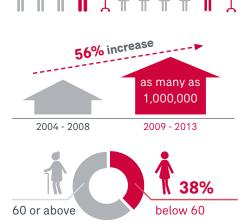

Life is unpredictable

Illnesses can come at unexpected moments and place a huge strain on your family

Executive Care Pro 2 will make sure you have the protection you need against critical illness up to age 100, freeing you and your loved ones from worry.

The rapid pace of life in Hong Kong can make a healthy diet and adequate physical exercise challenging to maintain, leaving the younger generation vulnerable to physical strain. Fortunately, health awareness and medical technology have progressed, paving the way for the early diagnosis and treatment of critical diseases and promising prognoses. Among the critical illnesses, cancer and heart complications are becoming increasingly common.

- In Hong Kong, **1 in 4** men and **1 in 5** women are at serious risk of contracting **cancer** before turning **75**¹.
- Between 2009 and 2013, as many as 1,000,000 people were hospitalised for cancer, representing a 56% increase² over the previous statistical period.
- Over the last ten years, approximately 38% of all cancer patients in Hong Kong were below 60³.

However, even in a constantly changing world, AIA will always be your lifelong partner through life's ups and downs. We make sure you have all the protection and care you need by providing you with a well-rounded critical illness protection insurance plan, so that you can protect yourself for your family's sake.

One stop care · Critical illness protection · Life insurance · Savings

Executive Care Pro 2 is a **participating insurance plan** that provides you with life insurance, critical illness protection in lump sum payment and the opportunity to accumulate your wealth. This plan can be purchased as a basic plan.

Extensive cover for 61 critical illnesses

Executive Care Pro 2 provides you with critical illness protections up to the age of 100. It covers 53 major illnesses, 2 minor illnesses, 1 early stage critical illness, 4 severe child diseases and female Carcinoma-in-situ.

If the worst should happen

If the insured, who is the person protected under the policy, passes away, we will pay the death benefit to the person whom you select in your policy as beneficiary. The death benefit will include:

- i. Current Sum Assured;
- ii. non-guaranteed cash amounts distributed on a yearly basis, called Annual Dividends, which have accumulated with interest under this policy; and
- iii. a one-off non-guaranteed cash amount, called a Terminal Dividend, provided that the policy has been in force for 10 years.

Current Sum Assured means the Initial Sum Assured left after deduction of all advance payment(s) made for the benefits of major illness, minor illness, early stage critical illness and female Carcinoma-in-situ and / or severe child disease. The Initial Sum Assured means the protection amount that you have purchased.

If the insured is diagnosed with any covered major illness, minor illness, early stage critical illness, female Carcinoma-in-situ and / or severe child disease, we will pay:

- i. the benefit amount for the covered illness (see the Covered Illnesses Benefit Schedule); and
- ii. the corresponding non-guaranteed Terminal Dividend, provided that the policy has been in force for 10 years.

If the insured is diagnosed with male cancer (i.e. testicular and prostate cancer) after his 18th birthday, in addition to the benefit for major illness, we will pay an extra 10% of benefit amount paid under major illness.

Excluding above male cancer benefits, the claims payments made in total for benefits under the policy cannot exceed 100% of the Initial Sum Assured (excluding any Terminal Dividend). Any advance payment(s) made will reduce the Current Sum Assured of the basic policy. The premium, guaranteed cash value, any future Annual Dividends and any future Terminal Dividend will also be reduced accordingly.

We will pay any remaining Annual Dividends accumulated with interest upon the last payment for death or covered illnesses.

We will deduct all outstanding debt under your policy before making the above payment.

Continuous protection

In case of any major illness claims made, the subsequent premium of the basic policy will be waived. Add-on plans (if any) attached to the basic policy will remain in force and provide cover if their respective premiums continue to be paid.

Wealth accumulation for lifelong benefits

Executive Care Pro 2 offers guaranteed cash value and non-guaranteed Annual Dividends. Such dividends (if any) shall be credited to your policy at the end of each policy year to help you accumulate wealth, so you can enjoy your future. You may choose to receive the Annual Dividends in cash or use them to reduce any premium due under this policy. Otherwise, these sums shall accumulate in your policy, potentially earning interest.

Also, once the basic policy has been in force for 10 years or more, we will provide you with a non-guaranteed Terminal Dividend if:

- i. you surrender the policy;
- ii. the insured passes away; or
- iii. we pay out the benefits for major illness, minor illness, early stage critical illness, female Carcinoma-in-situ and / or severe child disease (Terminal Dividend payable will be determined in accordance with the proportion of the benefits).

Greater financial flexibility with 5 premium payment terms

With **Executive Care Pro 2**, you can choose among 5 premium payment terms in order to enjoy whole-of-life insurance and critical illness protection until the age of 100.

Premium Payment Term	Insured's Age at Policy Issue	Benefit Term for Critical Illnesses
5 years		
10 years	15 days to age 65	Up to the age of 100 (Excluding Loss of Independent Existence and severe child disease)
15 years		
18 years	15 days to age 62	
25 years	15 days to age 55	

Different premium payment modes (annually, semi-annually, quarterly and monthly) are available for this plan.

At the time of application, we determine the amount of premium based on the age of the insured under the chosen premium payment term, and the premium is not expected to increase with age. The premium of the basic policy is not guaranteed, and we reserve our right to review and adjust the premium from time to time (please refer to the "Premium Adjustment" under Important Information).

In addition, you can choose between two cover levels of critical illness, Plan 100 or Plan 80. These respectively pay out 100% or 80% of the Initial Sum Assured as critical illnesses cover under your plan. Under Plan 80, the maximum critical illness benefit will be 80% of Initial Sum Assured. The remaining 20% Initial Sum Assured (i.e. Current Sum Assured) will be payable upon the death of insured.

For your convenience, we offer this policy in US dollars and HK dollars.

If you were unfortunately diagnosed with a serious disease, how would you cope with the financial burden of medical and recovery treatment? Could it potentially wipe out your savings and seriously impact your life and the lives of your family members? Do you have the financial resources to choose the most appropriate medical treatment while handling your obligations to your family to maintain their standard of living?

(The following example is hypothetical and for illustrative purposes only. It does not include non-guaranteed dividends. Actual dividends are not guaranteed and are declared at AIA's sole discretion.)

Occupation: Family status:

Policy owner and insured: Mr. Chan (Age 45, non-smoker) Customer Service Manager Married, with a son and a daughter

Mr. Chan purchases **Executive Care Pro 2*** with an Initial Sum Assured of HK\$1.4 million to protect himself and his family. The monthly premium is HK\$4,928 for a premium payment term of 18 years. Unfortunately, he is diagnosed with colorectal cancer. The plan can help him cope with his medical expenses without affecting his family's quality of life.

		HK\$
Medical expenses	Estimated total cost incurred due to colorectal cancer, including cost of diagnosis and treatment [^] .	800,000
Family obligations	Mr. Chan receives cancer treatment and home care for 2 years during his sickness, so he cannot work for an income. However, he still needs to fulfil family obligations during those 2 years (assumed to be HK\$300,000 every year).	600,000
Total protection required		1,400,000

The above case assumes the insured purchased Executive Care Pro 2 Plan 100.

These expenses are estimated based on the assumed conditions and normal circumstances over the course of 3 years of treatment. This includes cancer treatment through surgery, chemotherapy and targeted therapy.

Covered Illnesses Schedule

I. Critical Illness Benefit covering the following 55 Critical Illnesses

Α	Major Illnesses					
Gro	up 1 Cancer					
1	Cancer					
Group 2 Illnesses related to the Heart						
2	Cardiomyopathy	6	Infective Endocarditis			
3	Coronary Artery Surgery	7	Other Serious Coronary Artery Disease			
4	Heart Attack	8	Pulmonary Arterial Hypertension (Primary)			
5	Heart Valve Replacement and Repair	9	Surgery to Aorta			
Gro	up 3 Illnesses related to the Nervous System					
10	Alzheimer's Disease / Irreversible Organic Degenerative Brain Disorders	18	Motor Neurone Disease (including Spinal Muscular Atrophy, Progressive Bulbar Palsy, Amyotrophic Lateral Sclerosis and			
11	Apallic Syndrome		Primary Lateral Sclerosis)			
12	Bacterial Meningitis	19	Multiple Sclerosis			
13	Benign Brain Tumour	20	Muscular Dystrophy			
14	Coma	21	Paralysis			
15	Encephalitis	22	Parkinson's Disease			
16	Hemiplegia	23	Poliomyelitis			
17	Major Head Trauma	24	Progressive Supranuclear Palsy			
		25	Severe Myasthenia Gravis			
		26	Stroke			
Gro	up 4 Illnesses related to Major Organs and Function					
27	Acute Necrohemorrhagic Pancreatitis	32	Kidney Failure			
28	Aplastic Anaemia	33	Major Organ Transplant			
29	Chronic Liver Disease	34	Medullary Cystic Disease			
30	End-stage Lung Disease	35	Systemic Lupus Erythematosus (SLE) with Lupus Nephritis			
31	Fulminant Viral Hepatitis	36	Systemic Scleroderma			
	up 5 Other Major Illnesses					
37	AIDS due to Blood Transfusion	46	Loss of Two Limbs			
38	Blindness	47	Major Burns			
39	Chronic Adrenal Insufficiency (Addison's Disease)	48	Necrotising Fasciitis			
40	Creutzfelt-Jakob Disease	49	Occupationally Acquired HIV			
41	Ebola	50	Pheochromocytoma			
42	Elephantiasis	51	Severe Rheumatoid Arthritis			
43	Loss of Hearing	52	Loss of Independent Existence			
44	Loss of One Limb and One Eye	53 Terminal Illness				
45	Loss of Speech					
В	Minor Illnesses					
54	Cerebral Aneurysm Requiring Surgery					
55	5 Early Thyroid Cancer (at TNM classification T1N0M0)					

Covered Illnesses Schedule (continued)

II. Early Stage Critical Illness

Early Stage Critical Illness

Percutaneous Coronary Intervention

III. Male, Female and Childhood-related Illnesses

Male Cancer

- Testicular Cancer
- Prostate Cancer (at TNM classification T1c or above)

Female Carcinoma-in-situ В

Carcinoma-in-situ of:

- **Breast**
- Cervix uteri (at CIN III grading or CIS)
- Uterus
- Ovary
- Fallopian tube
- Vagina
- Vulva

Severe Child Disease C

- Insulin Dependent Diabetes Mellitus
- Still's Disease
- Kawasaki Disease with Heart Complications
- Osteogenesis Imperfecta Type III

Remarks:

Cover of cancer under major illnesses and the male cancer benefit (if applicable) do not include Early Thyroid Cancer (at TNM Classification T1N0M0 or a lower stage); early prostate cancer (at TNM Classification T1a or T1b or a lower stage); early chronic lymphocytic leukemia classified as less than RAI Stage III; skin cancer (except malignant melanoma); any cancer where HIV infection is also present; and any pre-malignant or non-invasive cancer or Carcinoma-in-situ.

Please refer to the policy contract for the definitions of covered illnesses.

Covered Illnesses Benefit Schedule

Type of		Benefit	Benefit (Percentage of Initial Sum Assured)	
Protection	Covered Illness	Term	Plan 80	Plan 100
55 Critical Illne	esses			
Maior III.	• 52 Major Illnesses	Up to age 100	80% advance payment	100%
Major Illness	Loss of Independent Existence	Up to age 65		
	Cerebral Aneurysm Requiring Surgery		40% advance payment	50% advance payment
Minor Illness	Early Thyroid Cancer	Up to age 100	16% advance payment	20% advance payment
	(at TNM classification T1N0M0)		subject to a maximum of HK\$240,000/US\$30,000 per life	
1 Early Stage C	ritical Illness			
Early Stage		Up to age 100	16% advance payment	20% advance payment
Critical Illness	Percutaneous Coronary Intervention		subject to a maximum of HK\$240,000/US\$30,000 per life	
5 Female and C	Childhood-related Illnesses			
Female	Carcinoma-in-situ of: breast, cervix uteri (***CIN III and display of CIO) arteria.	Age 18-100	16% advance payment	20% advance payment
Carcinoma- in-situ	(at CIN III grading or CIS), uterus, ovary, fallopian tube or vagina / vulva		subject to a maximum of HK\$240,000/US\$30,000 per life	
	Insulin Dependent Diabetes Mellitus		16% advance payment	20% advance payment
Severe Child	Still's Disease	Below		
Disease	Kawasaki Disease with Heart Complications	age 18	subject to a maximum of HK\$240,000/US\$30,000 per life	
	Osteogenesis Imperfecta – Type III			
Additional Ben	efit for Male Cancer	•		
	Testicular Cancer		Additional 10% of benefit amount paid for Major Illness subject to a maximum of HK\$120,000/US\$15,000 per life	
Male Cancer	Prostate Cancer (at TNM classification T1c or above)	Age 18-100		

Remarks

[•] The benefits paid for major illnesses will be reduced by any advance payments for minor illness, early stage critical illness, female Carcinoma-in-situ and / or severe child disease. Except additional benefit for male cancer, the advance claims payments made in total for benefits under the policy cannot exceed the Initial Sum Assured (excluding any Terminal Dividend). When the aggregate amount of any advance claims payments for benefits under the policy reaches 80% or 100% of the Initial Sum Assured, the benefits of major illness, minor illness, early stage critical illness, female Carcinoma-in-situ and severe child disease will cease to apply.

An advance payment will be payable 1 time for each covered illness (except severe child diseases); an advance payment will be payable for 1 time in total for severe child diseases.

Important Information

This brochure does not contain the full terms and conditions of the policy. It is not, and does not form part of, a contract of insurance and is designed to provide an overview of the key features of this product. The precise terms and conditions of this plan are specified in the policy contract. Please refer to the policy contract for the definitions of capitalised terms, and the exact and complete terms and conditions of cover. In case you want to read policy contract sample before making an application, you can obtain a copy from AIA. This brochure should be read along with the illustrative document (if any) and other relevant marketing materials, which include additional information and important considerations about this product. We would like to remind you to review the relevant product materials provided to you and seek independent professional advice if necessary.

This brochure is for distribution in Hong Kong only.

Dividend Philosophy

This is a participating insurance plan in which we share a portion of the profits earned on it and related participating insurance plans with the policy owners. It is designed to be held long term. The premiums of a participating insurance plan will be invested in a variety of assets according to our investment strategy. The cost of policy benefits (including guaranteed and non-guaranteed benefits as specified in your plan that may be payable on death, surrender or the occurrence of certain events such as hospitalization or diagnosis of a critical illness, as well as charges we make to support policy guarantees (if applicable)) and expenses will be deducted as appropriate from premiums of the participating insurance plan or from the invested assets. We aim to ensure a fair sharing of profits between policy owners and shareholders, and among different groups of policy owners.

Divisible surplus refers to profits available for distribution back to policy owners as determined by us. The divisible surplus that will be shared with policy owners will be based on the profits earned from your plan and similar plans or similar groups of policies (as determined by us from time to time by considering factors such as benefit features, policy currencies and period of policy issuance). Divisible surplus may be shared with the policy owners in the form of annual dividends and terminal dividends as specified in your policy.

We review and determine the dividend amounts payable to policy owners at least once per year. Divisible surplus depends on the investment performance of the assets which we invest in and the amounts of benefits and expenses we need to pay for the plan. It is therefore inherently uncertain. Nevertheless, we aim to deliver relatively stable dividend payments over time through a smoothing process by spreading out the gains and losses over a period of time. The actual dividends declared may be different from those illustrated or projected in any insurance plan information provided (e.g. benefit illustrations) depending on whether the divisible surplus, past experience and/or outlook are different from what we expected. If dividends are different from our last communication, this will be reflected in the policy anniversary statement.

A committee has been set up to provide independent advice on the determination of the dividend amounts to the Board of the Company. The committee is comprised of members from different control functions or departments within the organisation both at the AIA Group level as well as Hong Kong local level, such as office of the Chief Executive of the Company, legal, compliance, finance, investment and risk management. Each member of the committee will endeavour to exercise due care, diligence and skill in the

performance of his or her duties as a member. The committee will utilise the knowledge, experience, and perspectives of each individual member to assist the Board in the discharge of its duty to make independent decisions and to manage the risk of conflict of interests, in order to ensure fair treatment between policy owners and shareholders, and among different groups of policy owners. The actual dividends, which are recommended by the Appointed Actuary, will be decided upon the deliberation of the committee and finally approved by the Board of Directors of the Company, including one or more Independent Non-Executive Directors, and with written declaration by the Chairman of the Board, an Independent Non-Executive Director and the Appointed Actuary on the management of fair treatment between policy owners and shareholders.

To determine the dividends of a participating policy, we consider both past experience and the future outlook of all factors including, but not limited to, the following:

Investment returns: include interest earnings, dividends and any changes in the market value of the backing assets, i.e. the assets in which we invest your premiums (after deducting the cost of policy benefits and expenses). Depending on the asset allocation adopted for the insurance plan, investment returns could be affected by fluctuations in interest income (both interest earnings and the outlook for interest rates) and various market risks, including interest rate risk, credit spread and default risk, fluctuations in listed and private equity prices, real estate prices as well as foreign exchange rates if the currency of the backing assets is different from the policy currency, etc.

Claims: include claims for death benefits, critical illness benefits and any other insured benefits under the insurance plan.

Surrenders: include policy surrenders, partial surrenders and policy lapses; and their corresponding impact on the backing assets.

Expenses: include both expenses directly related to the policy (e.g. commission, underwriting, issue and premium collection expenses) and indirect expenses allocated to the insurance plan (e.g. general administrative costs).

Some participating insurance plans allow the policy owners to place their annual dividends, guaranteed and non-quaranteed cash payments, guaranteed and non-guaranteed incomes, guaranteed and non-guaranteed annuity payments with us, earning interest at a non-guaranteed interest rate. To determine such non-guaranteed interest rate, we consider the returns on the pool of assets in which these amounts are invested with reference to the past experience and future outlook. This pool of assets is segregated from other investments of the Company and may include bonds and other fixed income instruments. You have the right to request for historical accumulation interest rates before committing the purchase.

For dividend philosophy and dividend history, please visit our website at https://www.aia.com.hk/en/dividend-philosophy-history.html

EXECUTIVE CARE PRO 2

Investment Philosophy, Objective and Strategy

Our investment philosophy aims to deliver sustainable long-term returns in line with the insurance plan's investment objectives and the Company's business and financial objectives.

Our aforementioned objectives are to achieve the targeted long-term investment results while minimising volatility in investment returns to support the liabilities over time. They also aim to control and diversify risk exposures, maintain adequate liquidity and manage the assets with respect to the liabilities.

Our current long-term target strategy is to allocate assets attributed to this insurance plan as follows:

Asset Class	Target Asset Mix (%)	
Bonds and other fixed income instruments	60% - 80%	
Growth assets	20% - 40%	

The bonds and other fixed income instruments predominantly include government and corporate bonds and are mainly invested in the United States and Asia-Pacific. Growth assets may include listed equity, equity mutual funds, physical real estate, real estate funds, private equity funds and private credit funds, and are mainly invested in the United States, Asia-Pacific and Europe. Growth assets generally have a higher long-term expected return than bonds and fixed income assets but may be more volatile in the short term. The range of target asset mix may be different for different participating insurance plans. Our investment strategy is to actively manage the investment portfolio i.e. adjust the asset mix dynamically over a range that can be wider than the target range in response to the external market conditions and the financial condition of the participating business. For example, there may be a smaller proportion of growth assets when interest rates are low and a larger proportion of growth assets when interest rates are high. When interest rates are low, the proportion of growth assets may be even smaller than the long-term target strategy, so as to allow us to minimise volatility in investment returns and to protect our ability to pay the guaranteed benefits under the insurance plans, whereas the proportion of the growth assets may be even larger than the long-term target strategy when interest rates are high to allow for the possibility that we may share more investment opportunities in growth assets with the policy owners.

Subject to our investment objectives, we may use a material amount of derivatives (such as through pre-investing partly or fully expected future premiums) to manage our investment risk exposure and for matching between assets and liabilities, for example, the effects of changes in interest rates may be moderated while allowing for more flexibility in asset allocation.

Our general currency strategy is to minimise currency mismatches for bonds and other fixed income instruments. For these investments, our current practice is to endeavour to currency-match asset purchases with the currency of the underlying policy (e.g. US Dollar assets will be used to back US Dollar insurance plans and HK Dollar assets will be used to back HK Dollar insurance plans). However, subject to market availability and opportunity, bonds or other fixed income instruments may be invested in a currency other than the currency of the underlying policy and currency swaps may be used to minimise the currency risks. Currently assets are mainly invested in US Dollar. Growth assets may be invested in a currency other than the currency of the underlying policy and the selection of the currency is made according to our investment philosophy, investment objectives and mandate.

We will pool similar participating insurance plans for investment to determine the return and we will then allocate the return to specific participating insurance plans with reference to their target asset mix. Actual investments (e.g. geographical mix, currency mix) would depend on market opportunities at the time of purchase, hence may be different from the target asset mix.

The investment strategy is subject to change depending on the market conditions and economic outlook. Should there be any material changes in the investment strategy, we will inform policy owners of the changes, with underlying reasons and expected impact to the dividends.

Key Product Risks

 You should pay premium(s) on time and according to the selected premium payment schedule. If you stop paying the premium before completion of the premium payment term, you may elect one of the non-forfeiture options to surrender the policy or convert the policy to a non-participating insurance plan with life protection only. Compared with the original plan, such a plan will have less cover or a shorter term.

If no non-forfeiture option has been elected, the premium will be covered by a loan taken out on the policy automatically for one year so as long as the sum of guaranteed cash value and accumulated Annual Dividends with interest (if any) of the basic plan is sufficient to cover the premium in default and any outstanding debt. Afterwards, we will use the remaining cash value to convert to a non-participating insurance plan with life protection only. Any covered major illness, minor illness, early stage critical illness benefit, female Carcinoma-in-situ benefit, male cancer benefit and severe child disease benefit provided under the original policy will cease to apply.

- 2. The plan may make certain portion of its investment in growth assets. Returns of growth assets are generally more volatile than bonds and other fixed income instruments, you should note the target asset mix of the product as disclosed in this product brochure, which will affect the dividend on the product. The savings component of the plan is subject to risks and possible loss. Should you surrender the policy early, you may receive an amount considerably less than the total amount of premiums paid.
- 3. You may request for the termination of your policy by notifying us in written notice. Also, we will terminate your policy and you / the insured will lose the cover when one of the following happens:
 - the insured passes away;
 - you do not pay the premium within 31 days of the due date and the policy has no cash value;
 - the end of the benefit term if basic policy has been continued as a non-participating insurance plan;
 - the outstanding debt exceeds the guaranteed cash value of the policy. Where the premium is covered by a loan taken out on the policy automatically, the outstanding debt exceeds the sum of guaranteed cash value and accumulated Annual Dividends with interest (if any) of your policy; or
 - when the claims payments made in total for benefits under the policy reach 100% of the Initial Sum Assured (where no add-on plan is selected).
- 4. We underwrite the plan and you are subject to our credit risk. If we are unable to satisfy the financial obligations of the policy, you may lose your premium paid and benefits.

Effective from 1 January 2018, all policy owners are required to pay a levy on each premium payment made for both new and in-force Hong Kong policies to the Insurance Authority (IA). For levy details, please visit our website at www.aia.com.hk/useful-information-ia-en or IA's website at www.ia.org.hk.

- 5. You are subject to exchange rate risks for plans denominated in currencies other than the local currency. Exchange rates fluctuate from time to time. You may suffer a loss of your benefit values and the subsequent premium payments (if any) may be higher than your initial premium payment as a result of exchange rate fluctuations. You should consider the exchange rate risks and decide whether to take such risks.
- 6. Your current planned benefit may not be sufficient to meet your future needs since the future cost of living may become higher than they are today due to inflation. Where the actual rate of inflation is higher than expected, you may receive less in real terms even if we meet all of our contractual obligations.

Key Exclusions

Except for the death benefit, under this plan, we will not cover any of the following events or conditions that result from any of the following events:

- any illnesses with signs / symptoms or surgeries triggered by the illnesses before the application of the policy or within 90 days after the policy is issued;
- any congenital defect or disease has been diagnosed before the insured reaches the age of 17;
- Fulminant viral hepatitis or cancer of the insured was due to AIDS or HIV Infection: and
- a self-inflicted injury.

The above list is for reference only. Please refer to the policy contract of this plan for the complete list and details of exclusions.

Premium Adjustment

In order to provide you with continuous protection, we will review the premium of your plan from time to time within the premium payment term and adjust accordingly at the end of policy year if necessary. During the review, we may consider factors including but not limited to the following:

- claim costs incurred from all policies under this plan and the expected claim outgo in the future which reflects the impact of change in the incidence rate of deaths, covered illnesses and covered surgeries
- historical investment returns and the future outlook of the product's backing asset

- policy surrenders and lapses
- expenses directly related to the policy and indirect expenses allocated to this product

We will give you a written notice of any revision 31 days before the end of policy year.

Claim Procedure

If you wish to make a claim, you must send us the appropriate forms and relevant proof. You can get the appropriate claim forms in www.aia.com.hk, from your financial planner, by calling the AIA Customer Hotline (852) 2232 8888 in Hong Kong, or by visiting any AIA Customer Service Centre. For detail claim procedures, please refer to the Claim Procedure section in the policy contract. If you wish to know more about claim related matter, you may visit "File A Claim" section under our company website www.aia.com.hk

Suicide

If the insured commits suicide within one year from the date on which the policy takes effect, our liability will be limited to the refund of premiums paid (without interest) less any outstanding debt.

Incontestability

Except for fraud or non-payment of premiums, we will not contest the validity of this policy after it has been in force during the lifetime of the insured for a continuous period of two years from the date on which the policy takes effect. This provision does not apply to any add-on plan providing accident, hospitalisation or disability benefits.

Cancellation Right

You have the right to cancel and obtain a refund of any premiums and any levy paid by giving written notice to us. Such notice must be signed by you and submitted to the Customer Service Centre of AIA International Limited at 12/F, AIA Tower, 183 Electric Road, North Point, Hong Kong within 21 calendar days immediately following either the day of delivery of the policy or the Cooling-off Notice to you or your nominated representative, whichever is the earlier.

Please contact your financial planner or call AIA Customer Hotline for details
