Re: Notice of Changes to AIA Global Bond Fund (the “Fund”) under AIA Retirement Fund Scheme (the “Scheme”)

A. Changes pursuant to the revised Code on Unit Trusts and Mutual Funds (the “Code”)

The Fund invests solely in the Franklin Templeton Investment Funds – Templeton Global Total Return Fund (the “Underlying Fund”). The Underlying Fund is authorized by the Securities and Futures Commission (“SFC”) and hence is subject to the applicable requirements under the Code issued by the SFC. The Code has been revised.

The following key changes (the “Changes”) are made to the offering document of the Scheme as a result.

1. Enhancement of disclosures on net derivative exposure

The offering document has been amended to include disclosures on the expected maximum net derivative exposure arising from derivative investments. The net derivative exposure of the Underlying Fund is calculated in accordance with the requirements and guidance issued by the SFC, which may be updated from time to time.

Please refer to the table below for information on the net derivative exposure of the Underlying Fund.

Underlying Fund	Net Derivative Exposure (percentage of the net asset value of the Underlying Fund)
Franklin Templeton Investment Funds - Templeton Global Total Return Fund	More than 50% but up to 100%

2. Enhanced disclosure in relation to the exposures to debt instruments with loss-absorption features and the associated risks

Regarding A1, it is currently disclosed in the offering document that the Underlying Fund may invest extensively in financial derivative instruments for hedging, efficient portfolio management and/or investment purposes.

Both changes listed above will not result in any material change to the investment objective and risk profile of the Underlying Fund.

B. Elaborations on the investment policies to disclose its investment in Mainland China through the Bond Connect or directly (also referred to as China Interbank Bond Market “CIBM” direct)

The investment policies of the Underlying Fund have been elaborated to disclose that it may invest in Mainland China through the Bond Connect or CIBM direct. The maximum exposure is listed in the table below:

Underlying Fund	Investment in Mainland China through the Bond Connect or CIBM direct
Franklin Templeton Investment Funds - Templeton Global Total Return Fund	Less than 30%

The related risk disclosures have been enhanced in the offering document.

Other than as disclosed above, the investment manager of the Underlying Fund believes there will not be any additional risks as a result of the elaboration to the Underlying Fund's investment policies. There is no change to the operation and/or the manner in which the Underlying Fund is being managed.
