## 2 SIGNIFICANT ACCOUNTING POLICIES

The financial statements are presented in accordance with generally accepted accounting principles applicable to UCITS investment funds in Luxembourg and require management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

### a) Valuation of securities

Securities listed on a recognised stock exchange or dealt in on any other regulated market are valued at their last available prices at the valuation point, or, in the event that there should be several such markets, on the basis of their last available prices on the main market for the relevant security.

In normal market conditions, fixed income securities (including mortgage backed securities) are valued at mid market price at the valuation point, based on data provided by pricing vendors.

In the event that the last available price or mid market price (fixed income) does not truly reflect the fair market value of the relevant securities, the value of such securities will be based on the reasonably foreseeable sales price determined prudently and in good faith pursuant to procedures established by the Board of Directors of the Company.

## Notes to the financial statements (continued)

As at 31 December 2015

Securities not listed or traded on a stock exchange or not dealt on another regulated market are valued on the basis of the reasonably foreseeable sales price determined prudently and in good faith pursuant to procedures established by the Board of Directors of the Company.

Securities with a known short-term maturity date, are valued using an amortised cost method. This involves valuing an investment at its cost and thereafter assuming a constant amortisation to maturity of any discount or premium, regardless of the impact of fluctuating interest rates on the market value of the investments.

Investments in other Undertakings for Collective Investments (“UCIs”) are valued at the last available net asset value for the UCI in question.

Events may occur between the determination of an investment’s last available price and the determination of the Fund’s Net Asset Value per Share at the valuation point that may, in the opinion of the Board of Directors of the Company, mean that the last available price does not reflect the fair market value of the investment. In such circumstances the price of such investment shall be adjusted in accordance with the procedures adopted from time to time by the Board of Directors of the Company in their discretion. As at the date of this annual report, certain securities may be fair valued in accordance with these procedures.

If since the time of determination of the net asset value there has been a material change in the quotations in the markets on which a substantial portion of the investments attributable to an available Fund are dealt in or quoted, the Company may, in order to safeguard the interests of the shareholders and the Company, cancel the first valuation and carry out further valuations as appropriate.

### b) Valuation of Interest rate swaps

An Interest Rate Swap (“IRS”) is a bilateral agreement in which each of the parties agree to exchange a series of interest payments (usually fixed/floating) based on a notional amount that serves as a computation basis and that is usually not exchanged.

IRS contracts are valued by reference to service data providers, market data and algorithms.

The unrealised gain/loss as at year end is recorded under “Unrealised gain/loss on interest rate swap contracts” in the Statement of assets and liabilities. The changes in such amounts are recorded under “Net change in unrealised appreciation/(depreciation) on interest rate swap contracts” and the realised gain/loss under “Net realised gain/(loss) on interest rate swap contracts” in the Statement of operations and changes in net assets.

### c) Valuation of Credit default swaps

A Credit Default Swap (“CDS”) is a transaction in which two parties enter into an agreement, whereby the buyer pays the seller a periodic payment for the specified life of the agreement. The seller makes no payments unless a credit event, relating to a predetermined reference asset, occurs. If such an event does occur, the seller will then make a payment to the buyer, and the swap contract will terminate.

CDS contracts are valued by reference to service data providers, market data and algorithms.

The unrealised gain/loss as at year end is recorded under “Unrealised gain/loss on credit default swap contracts” in the Statement of assets and liabilities. The changes in such amounts are recorded under “Net change in unrealised appreciation/(depreciation) on credit default swap contracts” and the realised gain/loss under “Net realised gain/(loss) on credit default swap contracts” in the Statement of operations and changes in net assets.

The notional amount represents the highest potential liability of a contract and is not shown in the Statement of assets and liabilities.

### d) Valuation of Total return swaps

A Total Return Swap (“TRS”) is a transaction in which the buyer receives the performance of an underlying asset and in return the buyer pays funding costs and generally, an arrangement fee. The underlying asset may be, but not limited to, a specific security, basket of securities, other instruments and index.

TRS contracts are valued by reference to the mark to market value based on the market value of the underlying asset.

The unrealised gain/loss as at year end is recorded under “Unrealised gain/loss on total return swap contracts” in the Statement of assets and liabilities. The changes in such amounts are recorded under “Net change in unrealised appreciation/(depreciation) on total return swap contracts” and the realised gain/loss under “Net realised gain/(loss) on total return swap contracts” in the Statement of operations and changes in net assets.

### e) Valuation of Options

Options are contractual agreements that convey the right, but not the obligation, for the purchaser either to buy or sell a specific amount of a financial instrument at a fixed price, either at a fixed future date or at any time within a specified period.

Options are valued by reference to the expected future cash flow based on the market implied performance, spot level and the volatility of the underlying asset(s).

# Notes to the financial statements (continued)

As at 31 December 2015

In determining the accounting treatment for options, consideration is given to the nature of the instrument itself and the Fund's Investment objective. When the underlying is acquired or delivered upon exercise of an option, the acquisition cost or sale proceeds are adjusted by the amount of the premium paid. When an option is closed, the difference between the premium and the cost to close the position is recorded under "Net realised gain/(loss) on options" in the Statement of operations and changes in net assets. When an option expires, the premium is accounted for as a realised gain for options written or as a realised loss for options purchased.

For the Global Balanced Income Fund and Global Multi-Asset Income Fund, the net option premium received on written options will be recorded as income. When an option is closed, the cost to close the position is recorded under "Net realised gain/(loss) on options" in the Statement of operations and changes in net assets.

The market value of options as at year end is recorded under "Options at market value" in the Statement of assets and liabilities. The changes in unrealised gain/(loss) on options are recorded under "Net change in unrealised appreciation/(depreciation) on options" in the Statement of operations and changes in net assets.

## f) Valuation of Forward currency exchange contracts

A forward currency exchange contract is an agreement between two parties to exchange one currency for another at a specific price and date in the future.

Open forward contracts are valued by reference to the last available currency rates prevailing at the relevant valuation point.

The unrealised gain/loss as at year end is recorded under "Unrealised gain/loss on forward currency exchange contracts" in the Statement of assets and liabilities. The changes in such amounts are recorded under "Net change in unrealised appreciation/(depreciation) on foreign exchange transactions" and the realised gain/loss under "Net realised gain/(loss) on foreign exchange transactions" in the Statement of operations and changes in net assets.

## g) Valuation of Financial futures contracts

A financial futures contract is a contractual agreement, to buy or sell a particular commodity or financial instrument at a pre-determined price in the future. Financial futures contracts detail the quality and quantity of the underlying asset and they are standardised to facilitate trading on a futures exchange.

Futures contracts are valued at the last available prices, on the exchanges for which the contracts are traded on, as at the valuation point.

The unrealised gain/loss as at year end is recorded under "Unrealised gain/loss on financial futures contracts" in the Statement of assets and liabilities. The changes in such amounts are recorded under "Net change in unrealised appreciation/(depreciation) on financial futures contracts" and the realised gain/loss under "Net realised gain/(loss) on financial futures contracts" in the Statement of operations and changes in net assets.

At the time the Fund enters into a financial futures contract the Fund deposits and maintains with the broker as collateral an initial margin as required by the exchange on which the transaction is affected. Cash held by/owed to the broker as of 31 December 2015 is recorded as part of "Cash at banks" and "Bank overdrafts" in the Statement of assets and liabilities. Pursuant to the contract, the Fund agrees to receive from or pay to the broker an amount of cash equal to the daily fluctuation in the value of the contract. Such receipts or payments are known as the variation margin and are recorded by the Fund as unrealised appreciation/(depreciation) on financial futures contracts. When the contract is closed, the Fund records a "Net realised gain/(loss) on financial futures contracts" equal to the difference between the value of the contract at the time it was opened and the time it is closed.

## h) Income and securities transactions

Dividend income is recorded on the ex-dividend date. Interest income is accrued daily. Discounts and premiums are accreted and amortised as adjustments to interest income for short-term money market instrument only. Income from securities lending is recorded on a cash receipts basis.

Securities transactions are accounted for on a trade date basis, on the date the securities are purchased or sold. Realised gains or losses on the sale of securities are determined on the basis of the average cost method and are recorded under "Net realised gain/(loss) on sales of investments" in the Statement of operations and changes in net assets.

For the Global Mortgage Securities Fund, realised gains and losses on the sale of interest only mortgaged-backed securities are determined on a First In First Out (FIFO) basis of cost method and are recorded under "Net realised gain/(loss) on sales of investments" in the Statement of operations and changes in net assets.

## i) Valuation of Repurchase agreements

Under a repurchase agreement, the Company purchases securities and agrees to re-sell them at a mutually agreed upon date and price. A repurchase agreement is collateralised by securities. Repurchase agreements are valued at cost with interest accrued from the date of purchase.

# Notes to the financial statements (continued)

As at 31 December 2015

Repurchase agreements outstanding as at year end, if any, are included in the Statement of assets and liabilities. Net repurchase agreements income is included under "Bank interest" in the Statement of operations and changes in net assets.

## j) Translation of foreign currencies

Transactions in foreign currencies are translated into the currency of each Fund at the last available rate of exchange prevailing in a recognised market at the date of the transactions. Assets and liabilities denominated in foreign currencies are translated into the currency of each Fund at the last available rate of exchange prevailing in a recognised market at the date of the Statement of assets and liabilities.

The Combined statement of assets and liabilities is presented in US Dollars at the last available rate of exchange prevailing in a recognised market at the date of the Statement of assets and liabilities, while the combined Statement of operations and changes in net assets is presented in US Dollars at the average exchange rates ruling during the year.

The difference between opening net assets stated at exchange rates at the beginning of the year and their value at the end of the year is shown as "Translation difference" in the Statement of operations and changes in net assets.

## k) Mauritian subsidiary

The Indian Equity Fund currently invests through Morgan Stanley Investment Holding Company (Mauritius) Limited ("the Subsidiary"). All assets and liabilities, income and expenses of the Subsidiary are recorded in the Statement of assets and liabilities and the Statement of operations and changes in net assets of the Indian Equity Fund. All investments held by the Subsidiary are individually disclosed in the statement of investments of the Indian Equity Fund.

The Subsidiary incurs and pays certain fees and expenses relating to its investment activity in India. These fees and expenses may include brokerage costs and commissions, transaction costs associated with converting currency to and from Indian Rupee to US Dollars, fees incurred by its standing proxy, corporate and registration fees and taxes associated with the establishment and operation of the Subsidiary.

The audited financial statements of the subsidiary is made available to the shareholders free of charge upon request at the registered office of the Morgan Stanley Investment Holding Company (Mauritius) Limited: CIM Fund Services Ltd, 33 Edith Cavell Street, Port Louis, Republic of Mauritius.

## 3 SECURITIES LENDING

Certain Funds may lend securities to qualified financial institutions, such as broker-dealers, to earn additional income.

Any increase or decrease in the fair value of the securities loaned that might occur and any interest earned or dividends declared on those securities during the term of the loan would remain in the Fund. Funds that lend securities, receive securities as collateral in an amount equal to or exceeding 100% of the current fair value of the loaned securities. The collateral is marked to market daily, by the securities lending agent, to ensure that a minimum of 100% collateral coverage is maintained throughout the term of the loan. Securities lending income is generated as a result of securities on loan less compensation to the administrative agent. Net securities lending income is included in the Statement of operations and changes in net assets. See note 4(b) for related party disclosure on securities lending transactions.

The value of loaned securities, related collateral outstanding, identity of the counterparties, security lending income and associated operational costs and fees as at 31 December 2015 are as follows:

The Funds will also pay other expenses incurred in the operation of the Company out of the Administration Charge including, without limitation, formation expenses of new Funds, the fees of the Custodian, expenses for legal and auditing services, cost of any proposed listings, maintaining such listings, reporting and publishing expenses (including preparing, printing, advertising and distributing Shareholders' reports and prospectuses), the remuneration of the Directors including all reasonable out-of-pocket expenses, registration fees and other expenses due to supervisory authorities in various jurisdictions, insurance, interest, and the costs of publication of the Net Asset Value per Share, whether such publication is required for regulatory purposes or otherwise.

### 5 DIVIDEND POLICY

The Company offers Accumulating Share Classes, Distributing Share Classes and Discretionary Distributing Share Classes.

#### Approach to declaring dividends

*Funds other than US Dollar Liquidity Fund – Distributing Share Classes (Share Class Sub-Indicators “X” and “M”)*

For the Distributing Share Classes of the Bond Funds, Equity Funds, Asset Allocation Funds and Alternative Investment Funds, the Company intends to declare dividends which will be

equal to at least 85% of the net investment income attributable to such Classes.

For the Global Mortgage Securities Fund, net investment income is considered to include net realised gains and losses from prepaid principal on mortgaged-backed and asset-backed securities for the purpose of the dividend policy.

For the Global Balanced Income Fund and Global Multi-Asset Income Fund, net investment income is considered to include the net option premium received as a result of writing options for the purpose of the dividend policy.

*US Dollar Liquidity Fund – Distributing Share Classes (Share Class Sub-Indicator “X”)*

For the Distributing Share Classes of the US Dollar Liquidity Fund, the Company intends to declare dividends which will be equal to the net investment income attributable to such Classes and realised capital gains, reduced by realised losses, if any. In the case of the US Dollar Liquidity Fund, such dividends, if any, will be declared on each Dealing Day.

*Funds other than US Dollar Liquidity Fund – Discretionary Distributing Share Classes (Share Class Sub-Indicators “R” and “RM”)*

For the Discretionary Distributing Share Classes of the Bond Funds, Equity Funds, Asset Allocation Funds and Alternative Investment Funds, the Company intends to declare dividends which will be set at the discretion of the Board of Directors of the Company. The Discretionary Distributing Share Class may pay distributions from capital or may charge all or part of the Fund’s fees and expenses to the capital of the Fund. Dividends paid out of capital amount to a return or withdrawal of part of a Shareholder’s original investment or from any capital gains attributable to that original investment. Such dividends may result in an immediate decrease of the Net Asset Value per Share. Where part or all of the fees and expenses of a Share Class are charged to the capital of that Share Class the result will be a reduction of the capital that the Share Class has available for investment in the future and capital may be eroded.

#### Frequency of Dividends

*Equity Funds and Alternative Investment Funds – semi-annual dividend (Share Class Sub-Indicators “X” and “R”)*

Both the Distributing Share Classes (Share Class Sub-Indicator “X”) and Discretionary Distributing Share Classes (Share Class Sub-Indicator “R”) aim to declare semi-annual dividends for Equity Funds and Alternative Investment Funds. Such dividends, if any, will be accrued on the last Dealing Day of June and December and declared on the next Dealing Day. The dividend declaration will be made public at the registered office of the Company and made available at the offices of the Transfer Agent on the first Dealing Day of July and January.

## 6 TAXATION

Under current law and practice, the Company is not liable to any Luxembourg income tax, or any Luxembourg capital gains tax on the realised capital appreciation of the assets of the Company nor are dividends paid by the Company liable to any Luxembourg withholding tax. The Company is, however, liable to annual subscription tax in Luxembourg ("taxe d'abonnement") calculated at the rate of 0.05% of the Net Asset Value of the funds. Furthermore, the Company has sought the benefit of a reduced annual tax rate of 0.01% for Share Classes where the whole of the Share Class is held by institutional investors as provided by Article 174 of the 2010 Law, likely those Shares with Share Class Indicators N, S or Z. This tax is payable quarterly on the basis of the net assets of the relevant Funds, calculated at the end of the quarter to which the tax relates. No stamp or other tax will be payable in Luxembourg in connection with the issue of Shares of the Company, except a once and for all tax of EUR 1,239.47 which was paid upon incorporation.

Pursuant to Article 175 of the 2010 Law, subscription tax is not payable on the value of the assets of the Funds represented by investments in other Luxembourg undertakings for collective investment which are themselves subject to the subscription tax.

The Company is exempt from subscription tax in respect of the portion of the US Dollar Liquidity Fund ("the Feeder Fund") invested in the Morgan Stanley Liquidity Funds - US Dollar Liquidity Fund ("the Master Fund"), which is itself subject to a subscription tax of 0.01%. For those Shares with Share Class Indicator Z of the Feeder Fund, any proportion of the assets of the Share Class which is not invested in the Master Fund shall

be subject to the subscription tax at a rate of 0.01%. For all other Share Classes of the Feeder Fund any portion of the assets of the Share Class not invested in the Master Fund will be subject to the subscription tax of 0.05%. Please refer to note 15 for further details about the Feeder Fund and the Master Fund.

Subscription tax is calculated by reference to the net assets of the relevant fund or share class at the end of each quarter. Subscription tax will be paid from the tax d'abonnement Specific Additional Cost described in the prospectus. Any difference between the Specific Additional Costs collected and the tax payable will be paid by or credited to the Management Company.

Dividends, interest and capital gains on securities held by the Company may be subject to non-recoverable withholding tax or capital gains tax in the country of origin.

# Independent Auditor's Report

To the Shareholders  
of Morgan Stanley Investment Funds  
6B, route de Trèves  
L-2633 Senningerberg  
Luxembourg

We have audited the accompanying financial statements of Morgan Stanley Investment Funds (the "SICAV") and of each of its sub-funds, which comprise the statement of assets and liabilities and the statement of investments as at 31 December 2015 and the statement of operations and changes in net assets for the year then ended, and a summary of significant accounting policies and other notes to the financial statements.

*Responsibility of the Board of Directors of the SICAV for the financial statements*

The Board of Directors of the SICAV is responsible for the preparation and fair presentation of these financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements and for such internal control as the Board of Directors of the SICAV determines is necessary to enable the preparation and presentation of financial statements that are free from material misstatement, whether due to fraud or error.

*Responsibility of the "reviseur d'entreprises agréé"*

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier". Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the judgement of the "reviseur d'entreprises agréé", including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the "reviseur d'entreprises agréé" considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the Board of Directors of the SICAV, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

*Opinion*

In our opinion, the financial statements give a true and fair view of the financial position of Morgan Stanley Investment Funds and of each of its sub-funds as of 31 December 2015 and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

*Other matter*

Supplementary information included in the annual report has been reviewed in the context of our mandate but has not been subject to specific audit procedures carried out in accordance with the standards described above. Consequently, we express no opinion on such information. However, we have no observation to make concerning such information in the context of the financial statements taken as a whole.

## Appendix 4: Hedged Share Classes

### As at 31 December 2015

The Board of Directors of the Company may decide from time to time for some or all of the Funds to issue Currency Hedged Share Classes, and for some other or all of the Bond Funds to issue Duration Hedged Share Classes.

Currency Hedged Share Classes seek to reduce the currency exposure of the Shareholder to currencies other than the currency in which the Currency Hedged Share Class is denominated (the “Hedged Share Class Currency”). The hedging process will vary depending on the type of fund for which the Currency Hedged Share Class is issued and the hedging strategy adopted for all the Currency Hedged Share Classes in that particular Fund, as defined by the prospectus. The types of Currency Hedged Share Class are as follows:

*NAV Hedged Share Classes* (Share Class Sub-Indicator “H”) seek to reduce exposure to currency movements between the Hedged Share Class Currency and the Fund’s Reference Currency. This involves hedging the Fund’s Reference Currency back to the Hedged Share Class Currency without reference to the its Investment Currencies.

*Portfolio Hedged Share Classes* (Share Class Sub-Indicator “H1”) seek to reduce exposure to currency movements between the Hedged Share Class Currency and the Fund’s Investment Currencies. This involves hedging the Fund’s Investment Currencies back to the Hedged Share Class Currency without reference to its Reference Currency.

*NAV Hedged (Non-deliverable Currency) Share Classes* (Share Class Sub-Indicator “H3”) seek to reduce exposure to currency movements between a non-deliverable Hedged Share Class Currency and the Fund’s Reference Currency. This involves hedging the Fund’s Reference Currency back to the Hedged Share Class Currency without reference to the its Investment Currencies. As the Hedged Share Class Currency is non-deliverable the share class will be denominated in a currency other than the Hedged Share Class Currency for the purposes of subscription and redemption.

Duration Hedged Share Classes (Share Class Sub-Indicator “D”) utilise hedging strategies to seek to limit a share class’ exposure to interest rate movements.

Duration Hedged Share Class is indicated by a “D” after the Share Class indicator.

Share Classes may undertake both currency and duration hedging and are indicated by “O” after the share class indicator.
